**Name of Activity – Village Survey Village Gulani**

On April 20, 2023, a village socio-economic survey was conducted in Gulani Village, located in the Khed Taluka of Pune District. This survey was organized by the Geography Department of Huatma Rajguru Mahavidyalaya, Rajgurunagar, and involved 45 second-year students under the guidance of Prof. Dr. Dilip Muluk. The coordinators for the survey were Dr. D. M. Markad and M. L. Muluk. The purpose of this survey was to gather comprehensive data on various aspects of Gulani Village, including its demographics, economy, infrastructure, and overall development.

The survey was conducted through a combination of field visits, interviews, and data collection. Students were divided into teams to cover various aspects of the survey, and they were provided with questionnaires and checklists to aid in data collection. The following methodology was followed:

**Demographic Data:** Students collected information on population size, age distribution, gender, and ethnic composition through interviews and observations.

**Economic Data:** Information on the local economy, including sources of income and employment, was collected by visiting local businesses and conducting interviews with residents.

**Infrastructure and Services:** Teams assessed the availability and quality of infrastructure such as roads, schools, healthcare facilities, and water supply.

**Housing and Living Conditions:** Housing conditions and living standards were evaluated through on-site inspections and interviews with residents.

**Education and Healthcare:** Data on educational institutions and healthcare services were gathered by visiting schools, colleges, and healthcare centers.

**Environmental Factors:** The environmental aspects of the village, including natural resources and environmental challenges, were studied through field observations.

**The survey revealed the following key findings:**

**Demographics:** Gulani Village has a population of approximately 1,500 residents, with a relatively balanced age distribution and a majority belonging to the local ethnic group.

**Economy:** The local economy is primarily based on agriculture and small-scale businesses. A significant portion of the population is engaged in farming.

**Infrastructure:** While the village has basic infrastructure in place, there is room for improvement in road quality and access to clean water.

**Housing:** Housing conditions are generally adequate, with the majority of residents living in permanent structures.

**Education and Healthcare:** The village has primary and secondary schools, but access to higher education and specialized healthcare services is limited.

**Environmental Factors:** The village is surrounded by agricultural land, and the environmental challenges primarily relate to water management for irrigation.

**Recommendations:**

Based on the survey findings, the following recommendations are suggested for the development of Gulani Village:

**Improving Infrastructure:** Investment in road infrastructure and clean water supply systems to enhance accessibility and quality of life for residents.

**Education and Healthcare Access:** Efforts to expand access to higher education and specialized healthcare services.

**Agricultural Support:** Promote modern farming practices and efficient water management to enhance agricultural productivity.

**Environmental Conservation:** Implement sustainable practices for natural resource management and environmental conservation.

The Village Socio-economic Survey conducted by the Geography Department of Huatma Rajguru Mahavidyalaya, Rajgurunagar, provided valuable insights into the socio-economic conditions of Gulani Village. The survey not only served as a learning opportunity for the participating students but also offered recommendations that can contribute to the village's development. It exemplifies the importance of community engagement and field-based learning in geography education. The survey results can be used for future research and development initiatives in the region.
