The department of Computer Science organized short term course of 30 hours on “**Complete Web Designing Using WordPress**” for S.Y.B.Sc. (Computer Science) and T.Y.B.Sc. (Computer Science) students from 26/04/2023 to 04/05/2023. WordPress is a management system (CMS) that allows users to host and build websites. WordPress contains plugin architecture and a template system, so anyone can customize any website to fit their business, blog, portfolio, or online store. The most important WordPress functions allow user to customize your site’s appearance and functionalities such as include new fonts on your website, remove scripts, and disable the "continue reading" feature. The short-term course was conducted by experienced faculty members from the Computer Science Department, who have a deep understanding of WordPress and its applications in website designing. Students were provided with an overview of what is WordPress and its advantages. Hands-on training on essential WordPress command for website design was given to students. This short-term course was helpful in enhancing students understanding of WordPress and its capabilities. Feedback from participants was overwhelmingly positive.
