The Department of Mathematics and Statistics organized a Sudoku competition aimed at engaging undergraduate students in a challenging and enjoyable mathematical activity. Sudoku is a logic-based number placement puzzle that enhances critical thinking, problem-solving skills, and logical reasoning, all of which are crucial aspects of a mathematician's toolkit.

Objectives: The primary objectives of the Sudoku competition were as follows:

1. To promote the application of a logical reasoning and mathematical skill in a recreational context.
2. To encourage healthy competition and collaboration among undergraduate students.
3. To provide an opportunity for students to showcase their problem-solving abilities outside the classroom.

The competition was open to all undergraduate students. Students were scored on the basis of correct placement of numbers in the Sudoku grid and time taken to complete the puzzle. The competition saw enthusiastic participation from a significant number of undergraduate students. The event not only highlighted the student's problem-solving skill but also fostered a sense of camaraderie and health competition within the Mathematics and Statistics department. It provided a platform for students to engage in mathematical challenges beyond the scope of their regular coursework.

Conclusion: The Sudoku competition for undergraduate students organized by the Department of Mathematics and Statistics was a resounding success. It achieved by its objective of promoting logical reasoning, time management, and problem-solving among participants. The event showcased the talent and dedication of the students while reinforcing the importance of mathematical thinking in various aspects of life. The positive response from both participants and observers underscores the potential for future editions of the competition, and the department looks forward to continuing its efforts to create engaging and educational events for its students.
