Syllabus Completion Report

Class - T.Y.B.Sc Sem-V

Subject – Analytical Chemistry CH-502

Name of the Teacher- Prof. Dr. S.B.Suryawanshi

| Sr. No. | Month | Name of Chapter | Topic Covered | No. of Lect. Taken |
|----------------|----------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| 1 | Dec 2021 Jan 2022 | Gravimetry | <p>Introduction to Gravimetric Analysis, Common ion effect and solubility product principles, Conditions for good precipitation, Factors affecting precipitation like acid, temperature, nature of solvent, Super saturation and precipitation formation, Precipitation from homogeneous solution and examples, Co-precipitation, post-precipitation and remedies for their minimization, Washing of precipitate and ignition of precipitate, Organic Precipitants (8-hydroxy quinoline, DMG, Cupferron, Nitron, and Benzoin-alfa oxime, Anthranilic acid) Gravimetric Calculations-How Much Analyte is there.</p> <p>Applications of Gravimetry:</p> <p>Determination of Al(III) by 8-hydroxy</p> | 12 L |

| | | | | |
|--|--|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| | | | quinoline, Determination of calcium as oxalate, Determination of potassium as potassium tetraphenylborate, | |
| | | 3.Thermal methods of analysis | Differential Thermal Analysis :Introduction, instrumentation for DTA and DSC, experimental and instrumental factors, applications: DTA of copper sulphate pentahydrate, Purity of pharmaceutical by DSC | 03 L |

| | | | | |
|-----|----------|----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 2.. | Jan 2022 | 4.Parameters of instrumental analysis | Techniques, Methods, Procedures and Protocols, Selecting an Analytical Methods, Accuracy, Precision, Sensitivity, Selectivity, Robustness and Ruggedness, Scale of operation, equipment, Time and cost, Making the Final Choice, Developing the Procedure, Calibration and Standardisation, Sampling, Validation, Protocols, | 04L |
| 3. | Feb 2022 | 5.UV-Visible Spectroscopy | Introduction, Theory of spectrophotometry and colorimetry-Beer's law, Applications of Beer's law, Spectrophotometry: Wavelength selection by prism and diffraction grating, Radiation source, cells, and data presentation, single beam spectrophotometer, Double beam spectrophotometers, Choice solvent, general procedure for colorimetric estimation, simultaneous analysis, Application: Estimation of metal ions from aqueous solution : Boron in steel, Chromium in steel with diphenyl carbazide reagent, ammonia in water, Chlorine, Primary amine, Determination of pKa value of indicator, Determination of composition of metal complexes using Job's method of continuous variation and mole ratio method, | 10 L |

| | | | | |
|--|--|--|-------------|--|
| | | | Numericals. | |
|--|--|--|-------------|--|

Organic Chemistry Practicals

BATCH- A, B and C

| Sr.No | Month | Name of the Practical | Title of the Experiment | No of lectures |
|-------|----------|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------|----------------|
| 01 | Dec 2021 | Organic Chemistry Practical | Separation of water insoluble Solid-Solid mixture -01 | 05L |
| 02 | Dec 2021 | Organic Chemistry Practical | Separation of water insoluble Solid-Solid mixture -02 | 05L |
| 03 | Dec 2021 | Organic Chemistry Practical | Separation of water insoluble Solid-Solid mixture -03 | 05L |
| 04 | Dec 2021 | Organic Chemistry Practical | Separation of Solid-Liquid mixture -01 | 05L |
| 05 | Jan 2022 | Organic Chemistry Practical | Separation of Solid-Liquid mixture -02 | 05L |
| 06 | Jan 2022 | Organic Chemistry Practical | Separation of Liquid-Liquid mixture -01 | 05L |
| 07 | Feb 2022 | Organic Chemistry Practical | Green Chemistry Preparation -01 Bromination of Acetanilide using Ferric ammonium nitrate and KBr in aqueous medium. | 05L |
| 08 | Feb 2022 | Organic Chemistry Practical | Organic Preparations-01 Preparation of P-Iodonitrobenzene from P-Nitroaniline by Sandmeyer Reaction | 05L |
| 09 | Feb 2022 | Organic Chemistry Practical | Preparation of Organic Derivative-01 Preparation of Glucosazone derivative of Glucose | 05L |

K.T.S.P Mandal's
Hutatma Rajguru Mahavidyala
Rajgurunagar, Tal. Khed Dist. Pune

Syllabus Completion Report Year 2021-22 Class: F. Y. B. Sc., Sem.-I

Name of Paper: Physical Chemistry

No. of Lectures allotted per week: 03 T

Name of Teacher: Dr. S. P. Jadhav

Name of Paper : Physical Chemistry **Total No. Of Lectures Taken :** 35

| Sr. No. | Month | No. of Lect. Taken | Name of Chapter | Topic Covered |
|----------------|---------------|---------------------------|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | Sep-21 | 03 L | Chemical Energetics | Review of thermodynamics and the Laws of Thermodynamics. Important principles and definitions of thermochemistry. Concept of standard state and standard enthalpies of formations, integral and differential enthalpies of solution and dilution. |
| 2. | Oct-21 | 09 L | Chemical Energetics | Calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data. Variation of enthalpy of a reaction with temperature – Kirchhoff's equation. Statement of Third Law of thermodynamics and calculation of absolute entropies of substances, problems |
| 3. | Nov-21 | 05 L | Chemical Equilibrium: | Introduction: Free Energy and equilibrium - Concept, Definition and significance The reaction Gibbs Energy, Exergonic and endergonic reaction. |
| 4. | Dec-21 | 12 L | Chemical Equilibrium: | The perfect gas equilibrium, the general case of equilibrium, the relation between equilibrium constants, Molecular interpretation of equilibrium constant. The response of equilibria to conditions- response to pressure , response to temperature, Van't Haff equation, Value of K at different temperature, Problems |
| 5. | Jan-22 | 04 L | Ionic Equilibria | Strong, moderate and weak electrolytes, degree of ionization, factors affecting degree of ionization, ionization constant and ionic product of water. Ionization of weak acids and bases, pH scale, common ion effect. Salt hydrolysis-calculation of hydrolysis constant, degree of hydrolysis and pH for different salts. |
| 6. | Feb-22 | 02L | Ionic Equilibria | Buffer solutions. Solubility and solubility product of sparingly soluble salts– applications of solubility product principle. |

Dr. S. P. Jadhav
Subject Teacher

Dr. S. B. Suryawanshi
Head of the Department

|----------------|-------------------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| 1. | March 2022 | Electrochemical Cells | Electrochemical cells, reversible and irreversible cells with examples, The e.m.f. of electrochemical cell and its measurement, The Weston standard cell, Reference electrodes: The primary reference electrode and Secondary reference electrodes, The Nernst equation for E.M.F. of a cell. Types of reversible electrodes, the sign convention for electrode potentials, Thermodynamics of reversible cells and reversible electrodes, E.M.F. and equilibrium constant of cell reaction, Electrochemical series, Types of concentration cells, liquid junction potential, salt bridge, | 06L |
| 2. | April 2022 | Electrochemical Cells | Applications of emf measurements: 1. Determination of pH of a solution by using hydrogen electrode, quinhydrone electrode and glass electrodes 2. Potentiometric titrations: i) Acid-base titrations, (ii) Redox titrations. (iii) Precipitation titration, Batteries: Primary and Secondary batteries, applications for Secondary Batteries, Fuel Cells: Types of fuel cells, advantages, disadvantages of fuels cells, comparison of battery Vs fuel cell. | 10L |
| 3 | April 2022 | Crystal structure | Types of Solids: Isotropy and Anisotropy, Laws of crystallography: Law of constancy of interfacial angles, Law of rational indices, Law of crystal symmetry, Weiss indices and Miller indices, Crystal Structure: Parameters of the Unit Cells, Cubic Unit Cells: Three Types of Cubic Unit Cells, Calculation of Mass of the Unit Cell. Methods of Crystal structure analysis: The Laue method and Braggs method: Derivation of Bragg's equation, Determination of crystal structure of NaCl by Bragg's method, X ray analysis of NaCl crystal system, Calculation of d and λ for a crystal system, Numerical. | 10L |

| | | | | |
|----------|---------------------|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 4 | May 2022 | Nuclear Chemistry | Radioactivity, Types of Radiations, Properties of Radiations, Detection and Measurement of Radioactivity: Cloud chamber, Ionization Chamber, Geiger-Muller Counter, Scintillation Counter and Film Badges, Nuclear structure, Classification of nuclides, Types of Radioactive Decay, The Group Displacement Law, Kinetics of Radioactive Decay, Half-life, average life, Energy released in nuclear reaction, Mass Defect, Nuclear Binding Energy, Some applications of radio-isotopes as tracers: Chemical investigation – Esterification, Friedel - Craft reaction, Structural determination – Phosphorus pentachloride, Age determination – use of tritium and C14 dating, Problems. | 10L |

| Sr. No. | Month | Name of Chapter | Topic Covered | No. of Lect. Taken |
|---------|------------|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 1. | March 2022 | Solvent extraction | Introduction to solvent extraction, organic phase, Partition the theory of extraction (distribution coefficient, Distribution ratio, solute remaining unextracted, Separation coefficient), Factors favoring solvent extraction, Quantitative treatment to solvent extraction equilibrium, Ion association complexes, synergic extraction, some extraction reagent specifically used for inorganic ions (Acetylacetone, 8-Hydroxyquinoline, Diphenylthiocarbazone, Sodium diethyldithiocarbamate, Ammonium pyrrolidine dithiocarbamate), some practical aspects, Applications: determination of copper as the diethyldithiocarbamate complex, Determination of Fe(III) with 8-hydroxyquinoline, determination of nickel by synergistic extraction. Solid phase extraction | 08 |
| 2. | April 2022 | Instrumental Methods of Chromatographic Analysis | Principles of Chromatographic Separations, classification, Theory of Column Efficiency in Chromatography, (theoretical plate, rate theory of chromatography - the Van Deemter equation, efficiency and particle size in HPLC, retention factor efficiency and resolution, | 04 |
| 3 | April 2022 | High Performance Liquid Chromatography | Introduction, Types of liquid chromatography (liquid-solid, liquid-liquid, bonded phases), Choice of mode of separation, Equipment for HPLC: mobile phase, sample injection and column design (mobile phase, optimization of mobile phase, gradient elution, solvent delivery and sample injection, sample injection system, the column (effect of column length and column diameter), Choosing the Detector, Ultraviolet detector, Luminescence detector, RI detector, electrochemical detector, Column efficiency, | 06 |

| | | | | |
|----|----------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | | | HPLC chromatogram and its characteristics (retention time, peak height, peak area), method of quantitative analysis by HPLC, Example: determination of aspirin, phenacetin and caffeine in a mixture, numerical, | |
| 4 | May 2022 | Gas Chromatography | Introduction, Apparatus: A supply of carrier gas from a high-pressure cylinder, Sample injection system and derivatization, the column (Packed columns, Open tubular columns), the detector (properties, hot wire detector or TCD, FID, ECD), Quantitative analysis by GC (Area normalization method and internal standard addition method), Elemental analysis, numerical | 06 |
| 3. | May 2022 | Atomic Absorption Spectroscopy | Introduction, Elementary theory, Instrumentation, flames, the nebulizer-burner system, nonflame techniques, (graphite furnace, cold vapour technique), resonance line sources, monochromator, detectors, interferences, chemical interferences, background correction methods, Atomic absorption spectrophotometers, Experimental preliminaries (calibration curve methods, standard addition method) Preparation of sample (wet ashing, fusion, Dry ashing, microwave dissolution, concentration procedures), Detection limits, Estimation of Ca and Mg in water. | 08 |

Syllabus Completion Report Year 2021-22**

Class: T. Y. B. Sc. Chemistry,

Sem.-VI

Name of Paper: Organic Chemistry Practical-II

No. of Lectures allotted per week: 15

Name of Teacher: Prof. Dr. S.B.Suryawanshi

| Sr. No. | Name of Practical | Batch A | Batch B | Batch C |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------|------------|------------|------------|
| | | Date | Date | Date |
| 1 | .Estimation of Glucose | 30/03/2022 | 22/03/2022 | 28/03/2022 |
| 2 | Estimation of Glycine | 06/04/2022 | 29/03/2022 | 28/03/2022 |
| 3 | Estimation of alkali content in antacid using HCl | 13/04/2022 | 05/04/2022 | 04/04/2022 |
| 4 | Separation of mixture of O-nitro phenol and P-nitro phenol by column chromatography | 20/04/2022 | 19/04/2022 | 18/04/2022 |
| 5 | Separation of mixture of aldehyde and carboxylic acid by column chromatography | 27/04/2022 | 26/04/2022 | 02/05/2022 |
| 6 | Estimation of caffeine from tea leaves | 05/05/2022 | 05/05/2022 | 05/05/2022 |
| 7 | Determination of functional group of organic compounds from IR spectra Determination of structure of organic compound from given NMR spectra. | 07/05/2022 | 07/05/2022 | 07/05/2022 |

Syllabus Completion Report 2021-22 Class: T. Y. B. Sc. Chemistry, Sem.-VI

Name of Paper: Inorganic Chemistry-II **No. of Lectures allotted per week:** 03

Name of Teacher: Prof. Dongare N.D.

| Sr. No. | Month | Name of Chapter | Topic Covered | Lectures |
|---------|----------------|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| 1 | Mar-22 | Organometallic Chemistry | Definition of Organometallic compounds and Organometallic chemistry, CO as a π -acid donor ligand, binary metal carbonyls, classification of metal carbonyls, synthesis of metal carbonyls; (a) Direct reaction (b) Reductive carbonylation (c) Photolysis and thermolysis. Hepticity, Molecular and electronic structures of binary metal carbonyls, Electron count in complexes (18 electron rule). Applications of organometallic compounds in industrial catalysis (list of examples). Chemistry of ferrocene; Introduction, synthesis and physical properties of ferrocene. Reactions of ferrocene such as Friedel-Craft Acylation, Friedel-Craft Alkylation, Mannich reaction, Nitration and Halogenation. | 8L |
| 2 | Mar-22, Apr-22 | Homogeneous and Heterogeneous catalysis | Introduction to Catalysis, basic principles, activity and selectivity in catalysis, Types of catalysis, homogeneous vs. heterogeneous catalysis. Homogeneous catalysis: catalytic cycles for following reactions: a) Hydrogenation of olefins using Wilkinson complex, b) Hydroformylation of olefins using Cobalt and Rhodium complexes, c) Carbonylation reaction: methanol to acetic acid process i.e. Monsanto processes and d) C-C coupling reactions: Heck reaction. Heterogeneous catalysis: Classification of heterogeneous catalysts, supported metal catalyst, Role of support, Promoters and Poisons. Catalytic processes viz., a) Hydrogenation of olefins using Raney Nickel catalyst, b) Zeolites in catalysis: Catalytic cracking, c) Biodiesel synthesis using Heteropolyacids (HPAs) d) Automotive Exhaust catalysts: The catalytic converters. | 10L |
| 3. | Apr-22 | Bioinorganic Chemistry | Role of metals in bioinorganic chemistry, Classification as enzymatic and non-enzymatic metals, enzymatic redox metals such as Cu (SOD) and enzymatic non-redox metals such as Zn (Hydrolase). Role of metal ions in non-enzymatic processes-Na, K, Ca, Mg. Role of metals in enzymatic processes.II.Metalloproteins-Iron | 8L |

| | | | | |
|----|--------|------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | | | proteinsIntroduction of Fe-S proteins, Electron transfer proteins (Fe-S, Fe ₂ S ₂ , Fe ₃ S ₄ , Fe ₄ S ₄). Transport protein (transferrin) and Storage protein (ferritin) III. Bioinorganic Chemistry of Fe: Hemoglobin and myoglobin, its structure and functions and IV. Bioinorganic Chemistry of Co: Vitamin-B12, its structure and function. | |
| 4. | May-22 | Inorganic Polymers | Introduction, Types of inorganic polymers, comparison with organic polymers, synthesis, structural aspects and applications of silicates, silicones, siloxanes, borazines, and phosphazenes. | 5L |
| 5. | May-22 | Inorganic solids/ionic liquids of technological importance | Inorganic solids, Preparation of inorganic solids: Conventional heat and beat methods, Coprecipitation method, Sol-gel method and Hydro-thermal method. Introduction to Solid electrolytes, inorganic liquid crystals and their examples. Ionic liquids, synthesis and application of imidazolium and phosphonium based ionic liquids. | 5L |

Prof. Nita D. Dongare
Subject Teacher

Dr. S. B. Suryawanshi

K.T.S.P. Mandal's Hutatma Rajguru Mahavidyalaya

Rajgurunagar, Tal. Khed Dist. Pune

Syllabus Completion Report 2021-22 Class: T. Y. B. Sc. Chemistry, Sem.-VI

Name of Paper: Inorganic Chemistry-III **No. of Lectures allotted per week:** 03

Name of Teacher: Prof. Dongare N.D.

| Sr. No. | Month | Name of Chapter | Topic Covered | Lectures |
|----------------|----------------|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1. | Mar-22, Apr-22 | Acid–Base and Donor–Acceptor Chemistry | Acid–Base Models as Organizing Concepts, Arrhenius Concept, Bronsted–Lowry Concept, solvent system concept, Lux Flood concept, Lewis Concept, Frontier Orbitals and Acid–Base Reactions, Hard and soft acids and bases, theory of hard and soft acids bases, Acid and base strength (proton affinity, acidity and basicity of binary hydrogen compounds, inductive effects, steric effect, strength of oxy acids, acidity of cations in aqueous solutions, non-aqueous solvents and acid and base strengths, super acids). | 8L |
| 2. | Apr-22 | Ionic Solids | Crystalline and amorphous solids, crystal structures simple cubic, body centered cubic and face centered cubic, Properties of ionic solids, packing arrangements of anions in an ionic solids, Voids in crystal structure- tetrahedral and octahedral, Ionic radius, Palings univalent and crystal radii, Conversion of univalent radii to crystal radii, problems based on conversion of radii, Radius ratio effect, Lattice energy, Born-Lande equation, Born Haber cycle and its applications, Schottky and Frenkel defect. | 10L |
| 3. | Apr-22, May-22 | Chemistry of Zeolites | Historical Background, Natural and artificial Zeolites, 2. Zeolite Framework Types: Classification, Nomenclature, Database of Zeolite Structures, Channels, Building Units, Natural Tiles, Framework Density, Coordination Sequences 3. Zeolite Structures: Framework Composition, Extra-framework Species, Stacking Faults and Disorder 4. Synthesis of Zeolites: Introduction, Basic Zeolite Synthesis, Mineralizing Agents, Effects of water concentration, Gel preparation and crystallization 5. Applications1.Zeolites as Heterogeneous Catalysts: Critical Properties for Catalysis, Catalytic Applications, Zeolites for Fine Chemistry: Acylation and Alkylation Aromatic Hydrocarbons, 2. Zeolites for Adsorption and Separations | 8L |
| 4. | May-22 | Introduction to Nanochemistry | Synthesis and Stabilization of Nanoparticles by Chemical Reduction, Reactions in Micelles, Emulsions, and Dendrimers. Photochemical and | 5L |

| | | | | |
|----|--------|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | | | Radiation Chemical Reduction, Cryochemical Synthesis, Physical Methods. Particles of Various Shapes and Films, Properties and Application of Nanoparticles in Science and Technology (in brief), Applications of CNTs | |
| 5. | May-22 | Chemical Toxicology | Toxic chemicals in the environment, Impact of toxic chemistry on enzymes. Biochemical effect of Arsenic, Cadmium, Lead and Mercury. Biological methylation. | 5L |

K.T.S.P. Mandal's Hutatma Rajguru Mahavidyalaya

Rajgurunagar, Tal. Khed Dist. Pune

Syllabus Completion Report 2021-22

Class: S. Y. B. Sc. Sem.-IV

Name of Paper: Chemistry Practical

No. of Lectures allotted per week: 15

Name of Teacher: Prof. Dongare N.D.

| Sr. No. | Name of Practical | Batch A1 | Batch B1 | Batch B2 |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|------------|------------|
| 1 | Determine the cell constant of the given cell using 0.01 M KCl solution and determine dissociation constant of a given monobasic weak acid | 11/05/2022 | 11/05/2022 | 02/05/2022 |
| 2 | Conductometric titration of Strong acid against strong base | 11/05/2022 | 11/05/2022 | 02/05/2022 |
| 3 | Study of the variation of mutual solubility temperature with % concentration for the phenol - water system | 05/05/2022 | 08/04/2022 | 04/03/2022 |
| 4 | Study the effect of added electrolyte on the critical solution temperature of phenol-water system and to determine the concentration of the given solution of electrolyte. | 05/05/2022 | 08/04/2022 | 04/03/2022 |
| 5 | Verification the Freundlich and Langmuir adsorption isotherm for adsorption of acetic acid on activated charcoal. | 22/04/2022 | 23/04/2022 | 23/04/2022 |
| 6 | Synthesis of potassium Tris(oxalate)aluminium(III) using Al metal powder(Scrap aluminium). Comment on colour and magnetic properties of the complex. | 29/04/2022 | 29/04/2022 | 25/04/2022 |
| 7 | Synthesis of Tris(acetylaceton)iron(III) by green chemistry method by reaction between Fe(OH) ₃ and acac. Comment on colour and magnetic properties of the complex. | 22/04/2022 | 29/04/2022 | 25/04/2022 |
| 8 | Prepare standard solutions of KMnO ₄ / CuSO ₄ , record their absorbance and Verify Beer's Law and determine unknown concentration. | 21/04/2022 | 07/05/2022 | 16/04/2022 |
| 9 | Prepare solution of Fe(III) and SCN ⁻ in different molar proportion, record their absorbance and calculate equilibrium constant of [Fe(SCN)] ²⁺ complex | 11/05/2022 | 07/05/2022 | 02/05/2022 |

| | | | | |
|----|---------------------------------------------------------------------------------------------------------------------------------|------------|------------|------------|
| 10 | Determination of molecular weight of organic acid by titration against standardized NaOH - a) monobasic acid or b) dibasic acid | 13/04/2022 | 14/04/2022 | 11/04/2022 |
| 11 | Determination of the amount of acetamide in given solution by volumetric method | 13/04/2022 | 14/04/2022 | 11/04/2022 |
| 12 | Journal Certification | 18/05/2022 | 19/05/2022 | 20/05/2022 |
| 13 | Internal Examination (Oral) | 24/05/2022 | 21/05/2022 | 21/05/2022 |

| | | Numerical Techniques | Prof. Udhane R.B. |
| 6 | F.Y.B.Com | Business Mathematics & Statistics | Prof. Udhane R.B. |

Class: S.Y.B.Sc
Name: R. M. Wayal

Subject : Calculus of Several Variables
No. of Lectures:49

| Month | Topic | No. of lecture |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Oct 2021 | Limit by using substitution, different paths and polar co-ordinates | 05 |
| Nov 2021 | Functions of Several Variables, Functions of two variables, Domain and Range, Graphs, Level Curves, Functions of Three or More Variables | 09 |
| Dec 2021 | Definition and examples of Higher Derivatives, Clairaut's Theorem (Statement Only), Partial Differential Equations, Wave equation. Differentiable function, Differentials. Chain Rule, Homogeneous Functions, Euler's theorem | 16 |
| | Extreme values of functions of two variables. Necessary conditions for extreme values. Second Derivative Test. Lagrange Multipliers. Iterated | |

| | | |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Jan 2022 | Integrals, Fubini's Theorem. Double integral over general regions, Change of order of integration for two variables. | 12 |
| Feb 2022 | Double integral in Polar coordinates. Triple integrals, Evaluation of triple integrals. Triple integrals in spherical coordinates. Jacobians, Change of variables in multiple integrals | 07 |

Class: T.Y.B.Sc
Name: R. M. Wayal

Subject : Metric Spaces
No. of Lectures:42

| Month | Topic | No. of lecture |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Oct 2021 | Definition and examples. Open Balls. | 06 |
| Nov 2021 | Open Sets, Convergent Sequences | 07 |
| Dec 2021 | Limit and Cluster points, Cauchy Sequences and Completeness, Bounded Sets, Dense Sets Boundary of a set. Continuous Functions. Equivalent Definitions of Continuity, Topological Property. Uniform Continuity. Limit of a Function | 13 |
| Jan 2022 | Open and closed maps. Compact Spaces and their Properties | 10 |
| Feb 2022 | Connected Spaces | 06 |

Class: T.Y.B.Sc
Name: R. M. Wayal

Subject : Ordinary Differential Equation
No. of Lectures:42

| Month | Topic | No. of lecture |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Oct 2021 | Constant coefficient homogeneous equations Characteristic equations, distinct real roots, repeated roots | 05 |
| Nov 2021 | Complex roots. Particular solution, Initial value problem, The operator $\frac{1}{f(D)}$ and its evaluation for the functions $x^m, e^{ax}, e^{ax}V$. | 06 |
| Dec 2021 | xV and the operator $\frac{1}{D^2+a^2}$ acting on $\sin ax$ and $\cos ax$, Principle of superposition, Method of undetermined coefficients 2.3 Method of reduction of order 2.4 Method of variation of parameters. | 12 |
| Jan 2022 | Review the properties of power series, Series solution near an ordinary point, Regular singular points, Euler equations, Introduction to system of differential equations | 10 |

| | | |
|---------------------|-------------------------------------------------------------------------------------------------------|-----------|
| Feb 2022 | Linear systems: basic theory of homogeneous linear systems, constant coefficient Homogeneous systems. | 07 |
|---------------------|-------------------------------------------------------------------------------------------------------|-----------|

Class: T.Y.B.Sc
Name: R. M. Wayal

Subject : LaTeX
No. of Lectures:40

| Month | Topic | No. of lecture |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Dec 2021 | Definition and application of LaTeX, Preparation and Compilation of LaTeX input file LaTeX Syntax, Keyboard Characters in LaTeX Unit. Text and Math Mode Fonts. Emphasized and Colored Fonts, Sectional Units, Labeling and Referring Numbered Items, Texts Alignment and Quoted text, New Lines and Paragraphs, Creating and Filling Blank Space Producing Dashes Within Texts Unit | 16 |
| Jan 2022 | Listing Texts, Tabbing Texts Through the tabbing Environment | 14 |
| Feb 2022 | Table Through the tabular Environment, Table Through the tabularx Environment, Vertical Positioning of Tables, Sideways (Rotated) Texts in Tables, Adjusting Column Width in Tables, Additional Provisions for Customizing Columns of Tables, Merging Rows and Columns of Tables. | 12 |

Class - F.Y.B.Cs(Comp. Sci)

Subject:- Discrete Mathematics

Name:-Prof. Rakshe A.R.

Total No. of lectures per week - 53

| Month | Topic | No. of lecture |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| October 2021 | Propositional Logic, Predicates and Quantifiers Rules of Inference, Poset, Hasse diagram. Lattices, Complemented lattice , Bounded lattice and Distributive lattice . Boolean Functions Boolean Function of degree n, | 06 |
| November 2021 | Boolean identities, Definition of Boolean Algebra .Representation of Minterm, Maxterm Disjunctive normal form, Conjunctive normal Form. Counting Principles Cardinality of a finite set. | 08 |
| December 2021 | The Product Rule, The Sum Rule, The Inclusion-Exclusion Principle. The Pigeonhole Principle: Statement, The Generalized Pigeonhole Principle, Its applications. | 16 |
| January 2022 | Permutation and Combination with Repetitions, Permutations with Indistinguishable Objects, Distributing objects into box. | 14 |
| February 2022 | Recurrence Relations : Introduction, Formation. Linear Recurrence Relations with constant coefficients. Homogeneous Solutions. Particular Solutions. Total Solutions | 09 |

Class - T.Y.B.Sc
Name:-Prof. Rakshe A.R.

Subject:- Operation Research
Total No. of lectures - 42

| Month | Topic | No. of lecture |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Oct 2021 | Two variable LP Model, Graphical LP solution, Selected LP Applications, Graphical Sensitivity analysis. LP Model in equation form, | 06 |
| Nov 2021 | Transition from graphical to algebraic solutions, the simplex method, Artificial starting solutions. | 06 |
| Dec 2021 | Unbounded Solution , No Solution, Alternate Solution . | 12 |
| January 2022 | Definition of the dual problem, How to find primal solution LPP. | 13 |
| February 2022 | Primal dual relationship , Definition of the Transportation model . The Transportation algorithm , The Hungarian method , Simplex explanation of the Hungarian method. | 05 |

Class - T.Y.B.Sc
Name:-Prof. Rakshe A.R.

Subject:- Real Analysis - I
Total No. of lectures - 45

| Month | Topic | No. of lecture |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| October 2021 | Operations on sets, Functions, Real-valued functions, Equivalence countability, Real numbers, Cantor set, Least upper bounds | 06 |
| November 2021 | Definition of sequence and subsequence, Limit of a sequence, Convergent sequences, Monotone sequences, Divergent sequences, Limit superior | 06 |
| December 2021 | Limit inferior, Cauchy sequences ,Convergent and divergent series, series with non-negative terms, alternating series, Conditional and Absolute convergence, Rearrangement of series | 13 |
| January 2022 | Tests of absolute convergence, ratio test, comparison test , cauchy condensation test | 15 |
| February 2022 | series whose terms form a non-increasing sequence, The class l_2 | 05 |

Class - F.Y.B.Sc
Name:-Prof. Gargote A.M.

Subject:- Algebra
Total No. of lectures -45

| Month | Topic | No. of lecture |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| October (2021) | Definition of sets, types of sets, def of Relation, Equivalence relation & examples Equivalence classes and partitions of a set, Def of function & its example, Basic terminology, Types of Function, Inverse of function, Composition of function | 06 |
| November (2021) | Mathematical induction, well ordering principle, the Division Algorithm, The greatest common Divisor, Euclid's lemma, the Least common multiple, the Euclidean Algorithm | 06 |
| December (2021) | The Fundamental theorem of Arithmetic, Def of prime numbers, theorems and examples, Euclid's lemma, The theory of Congruences, Basic properties of Congruences, theorems and examples, Fermat's theorem and examples. | 12 |
| January (2022) | Introduction of Complex number, sum & products of complex no.s, Basic algebraic properties of complex no.s, Moduli, Complex conjugates, Exponential form, Products & Quotients. | 14 |
| February (2022) | De-Moivre's thm, Roots of complex no.s, The nth roots of unity, Regions in complex plane. | 07 |

Class - F.Y.B.Sc

Subject:- Calculus I

Name:-Prof. Gargote A.M.

Total No. of lectures - 45

| Month | Topic | No. of lecture |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| October (2021) | Algebraic properties of \mathbb{R} , Order properties of \mathbb{R} , Well-Ordering Property of \mathbb{N} , Arithmetic mean-Geometric mean inequality, Bernoulli's inequality, Absolute value function and its properties, triangle inequality and its consequences. | 06 |
| November (2021) | Definitions of Upper bound, Lower bound, supremum, infimum of subsets of \mathbb{R} , completeness property of \mathbb{R} , Archimedean property and its consequences, The density theorem, sequences of real numbers | 06 |
| December (2021) | Definition of limit of sequence and uniqueness of limit, bounded sequence, Monotone sequences, Monotone convergence theorem, Definition of subsequence, Divergence criteria, Monotone Subsequence theorem, Bolzano -Weierstrass theorem, The Completeness Property of \mathbb{R} . | 12 |
| January (2022) | Functions, domain and range, graphs of functions, Piecewise defined functions, increasing and decreasing functions, symmetry, common functions, limit of a function, divergence criteria, Squeeze theorem, one-sided limits, infinite limits, Definition of continuous function at a point, sequential criterion for continuity, Divergence criterion, combination of continuous functions. | 14 |
| February (2022) | Properties of continuous functions on an interval, Boundedness theorem, The minimum -maximum theorem, Location of root theorem, Bolzano's intermediate value theorem. Continuous function maps closed bounded interval to closed bounded interval. | 07 |

Class:- T.Y.B.Sc

Subject:- Laplace Transforms and Fourier series

Name:-Prof. Gargote A.M.

Total No. of lectures - 38

| Month | Topic | No. of lecture |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| October (2021) | Definition, Laplace Transform of some elementary functions. Some important properties of Laplace Transform. | 06 |
| November (2021) | Laplace Transform of derivatives, Laplace Transform of Integrals., Methods of finding Laplace Transform, Evaluation of Integrals. | 05 |
| December (2021) | The Gamma function, Unit step function and Dirac delta function. Definition, Some inverse Laplace Transform. Some important properties of Inverse Laplace Transform, Inverse Laplace Transform of derivative. | 12 |
| January (2022) | Inverse Laplace Transform of integrals. Convolution Theorem, Evaluation of Integrals. Solution of Ordinary Differential Equations with constant coefficients. | 10 |
| February (2022) | Definition and examples of Fourier Series. | 05 |

Class - S.Y.B.Sc.

Subject:- Numerical Analysis &It's Application

Name:- Prof. Udhane R.B.

Total No. of lectures - 37

| Month | Topic | No. of lecture |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| November (2021) | Solution of Algebraic and Transcendental Introduction, Error and their computation Bisection method - without derivation and convergence, The method of false position, Newton - Raphson Method - without derivation &convergence. | 10 |
| December (2021) | Interpolation Introduction, Finite difference operators and their relation, Difference Operators - Forward , Backward , Shift (E), Relations between them. Forward & Backward Difference tables. Factorial notation Newton's Forward Difference & Backward Difference | 9 |
| January (2022) | interpolation Formula Lagrange's formula for interpolation with unequallypace points, Numerical Differentiation Introduction. Numerical Differentiation. Numerical Integration - A General Quadrature formula, The rapezoidal rule,Simpson's 1/3rd rule, Simpson's 3/8th rule. | 6 |
| February (2022) | Numerical Solutions of Ordinary Differential Equations Introduction. Taylor's series method, Picard's Method successive approximations. | 12 |

| | | |
|--|--------------------------------------------------------------------------------------|--|
| | Euler's & Modified Euler's Methods. Runge Kutta Method (Second and fourth order). | |
|--|--------------------------------------------------------------------------------------|--|

Class - F.Y.B.Com

Subject:- Business Mathematics & Statistics

Name:- Prof. Udhane R.B.

Total No. of lectures - 46

| Month | Topic | No. of lecture |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| November (2021) | Interest & Annuity Interest:- Concept of Present value and future value, simple interest, compound interest, nominal and effective rate of interest, example and problems. Annuity:- Ordinary Annuity, Sinking Fund, Annuity due, present value and future value, equated monthly installment by interest of reducing balance and flat interest method, examples and problem | 06 |
| December (2021) | Shares and Mutual Funds Interest, Share :- Concept of share, face value, market value, dividend, brokerage, equity shares, preferential shares, examples and problem. Mutual Funds:- Concept of mutual funds, problems on calculation of net income, Change in net asset value. | 11 |
| January (2022) | Population and Sample Definition of Statistics, Scope of statistics in economics, Management Science and Industry. Concept population and sample, method of data collection: Census and sampling with illustration. method of random sampling -(SRSWR, SRSWOR, Stratified, Systematic) | 12 |
| February (2022) | Measures of Central Tendency and Measures of Dispersion Frequency distribution : Row data, attributes and variables, classification of data, frequency distribution, cumulative frequency distribution, Histogram and ogive curves. Requisites of ideal | 17 |

Class - S.Y.B.Sc(Comp.Sci)

Subject:- Numerical Techniques

Name:- Prof. Udhane R.B

Total No. of lectures - 36

| Month | Topic | No. of lecture |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| November (2021) | <i>Solution of Algebraic and Transcendental</i> Introduction, Error and their computation Bisection method - without derivation and convergence, The method of false position, Newton - Raphson Method - without derivation & convergence. | 5 |
| December (2021) | Interpolation , Introduction, Finite difference operators and their relation, Difference Operators - Forward, Backward, Shift (E), Relations between them. Forward & Backward Difference tables. Factorial notation Newton's Forward Difference & Backward | 11 |

| | | |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| | Difference | |
| January (2022) | interpolation Formula, Lagrange's formula for interpolation with unequally, Divided Difference, Newton's Divided Difference formula. Numerical Integration Introduction. Numerical Differentiation. Numerical Integration - A General Quadrature formula, The Trapezoidal rule, Simpson's 1/3rd rule, Simpson's 3/8th rule. | 6 |
| February (2022) | Numerical Solutions of Ordinary Differential Equations Introduction. Euler's & Modified Euler's Methods. Runge Kutta Method (First, Second, third and fourth order). | 9 |

Class - T.Y.B.Sc.

Name:- Prof. Karle S. N.

Subject:- Group Theory

Total No. of lectures - 42

| Month | Topic | No. of lecture |
|--------------------|-----------------------------------------------------------------------------------------------------|----------------|
| October (2021) | Binary Operations, Isomorphic Binary Structures, Groups. | 8 |
| November (2021) | Exampmles of groups, Subgroups, Cyclic Groups. | 12 |
| December (2021) | Cosets, Groups of Permutations, Orbits, Cycles, Alternating Groups, Cosets, the Theorem of Lagrange | 10 |
| January (2022) | Direct Products, Homomorphism, Factor Groups Factor Group Computations. | 8 |
| February (2022) | Simple Groups | 4 |

Class - T.Y.B.Sc.

Name:- Prof. Karle S. N.

Subject:- Programming in Python-I

Total No. of lectures - 35

| Month | Topic | No. of lecture |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| October (2021) | Installation of Python, Values and types: int, float The Print Function: Print basics, Variables: assignment statements, printing variable values, types of variables. Mathematical Operators, operands and precedence: +, -, /, *, **, % PEMDAS (Rules of precedence) String operations: + : Concatenation, * : Repetition, Boolean operator, Comparison operators: ==, !=, >, <=, Logical operators: and, or, not, Mathematical functions from math, cmath modules, random module, Keyboard input: input() statement, Calculus: Differentiation, Integration, Limit and Series, Strings: Length | 15 |

| | | |
|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | (Len function)String traversal: Using while statement, Using for statement,String slice,Comparison operators (>, <, ==),Lists:List operations,Use of range function,Accessing list elements,List membership and for loop,List operations,Updating list: addition, removal or updating of elements of a list, TuplesDefining a tuple,Index operator,Slice operator,Tuple assignment, Tuple as a return value | |
| November (2021) | <u>Unit 3: Iterations and Conditional statements</u> 3.1 Conditional and alternative statements, Chained and Nested Conditionals:, if-else, if-elif-else, nested if, nested if-else,Looping statements such as while, for etc, Tables using while,Functions:Calling functions: type,Type conversion: int, float, str Composition of functions, Returning values from functions, User defined functions, Parameters and argument, Matrix construct, eye(n), zeros(n,m) matrices,Addition, Subtraction, Multiplication of matrices, powers and inverse of a matrix.Accessing Rows and Columns, Deleting and Inserting Rows and Columns,Determinant, reduced row echelon form, nullspace, columnspace, Rank Solving systems of linear equations (Gauss Elimination Method, Gauss Jordan Method,LU-decomposition Method) Eigenvalues, Eigenvectors, and Diagonalization | 12 |
| December (2021) | <u>Unit 5: Numerical methods in Python</u> 5.1 Roots of Equations 5.2 Newton-Raphson Method 5.3 False Position (RegulaFalsi) Mehtod 5.4 Numerical Integration: 5.4.1 Trapezoidal Rule, 5.4.2 Simpson's 1/3rd Rule, 5.4.3 Simpson's 3/8th Rule <u>Unit 6: 2D and 3D Graphs</u> 6.1 Installation of numpy, matplotlib packages 6.2 Graphs plotting of functions 6.3 Different formats of graphs, PyDotPlus (Scalable Vector Graphics), PyGraphviz. Decorate Graphs with Plot Styles and Types: Markers and line styles, Control colors, Specifying styles in multiline plots, Control linestyle, Control marker styles. Polar charts: Navigation Toolbar with polar plots, Control radial and angular grids. 6.4 Three-dimensional Points and Lines 6.5 Three-dimensional Contour Plots, Wireframes and Surface Plots. | 8 |

| | | |
|--|--------------------------------------------------------------------|--|
| | 6.5 Three-dimensional Contour Plots, Wireframes and Surface Plots. | |
|--|--------------------------------------------------------------------|--|

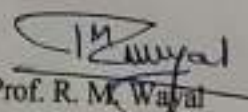

Class - F.Y.B.Sc. (Comp. Sci.)

Name:- Prof. Karle S. N.

Subject:- Matrix Algebra

Total No. of lectures - 42

| Month | Topic | No. of lecture |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| October (2021) | Unit 1. Integers 1.1 Division Algorithm (without Proof) 1.2 G.C.D. using division algorithm and expressing it as linear combination 1.3 Euclid's lemma 1.4 Equivalence relation (revision), Congruence relation on set of integers, Equivalence class partition | 6 |
| November (2021) | Unit 2. Groups 2.1 Binary Operation 2.2 Group: Definition and Examples 2.3 Elementary Properties of Groups | 6 |
| December (2021) | Unit 3. Finite Groups and Subgroups 3.1 Order of a group, order of an element 3.2 Examples $(\mathbb{Z}_n, +)$ and $(U(n), *)$ 3.3 Subgroup definition, Finite subgroup test, subgroups of \mathbb{Z}_n 3.4 Generator, cyclic group, finding generators of \mathbb{Z}_n (Corollary 3.4) 3.5 Permutation group, definition, composition of two permutations, representation as product of disjoint cycles, inverse and order of a permutation, even/odd permutation 3.6 Cosets: Definition, Examples and Properties, Lagrange Theorem(without | 14 |
| January (2022) | Unit 4. Groups and Coding Theory 4.1 Coding of Binary Information and Error detection 4.2 Decoding and Error Correction 4.3 Public Key Cryptography I | 12 |
| February (2022) | 4.3 Public Key Cryptography II | 4 |

| 6 | F.Y.B.Com | Business Mathematics & Statistics - II | Prof. Udhane R.B. |
|---|-----------|----------------------------------------|-------------------|

Class - F.Y.B.Sc.

Subject:- Analytical Geometry

Name:-Prof. Gargote A.M.

No. of lectures per week - 03

| MONTH | TOPIC | No. of lecture |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| April | Analytical Geometry of Two Dimension: Change of axes Translation and Rotation.Conic Section: general equation of second degree in two variables.Reduction to standard form , centre of conic ,nature of conic | 12 |
| May | Planes: Direction cosines and direction ratios, equation of plane , normal form ,transform to the normal form , plane passing through three non-linear points ,intercept form ,angle between two planes , Distance of a point from plane ,distance between parallel planes,system of planes,two sides of planes ,bisector of planes | 12 |
| June | Lines in three dimensions: Equation of a line in symmetric and unsymmetrical forms, line passing through two points,angle between a line and a plane,perpendicular distance of a point from a plane, condition for two lines to be coplanar Sphere: Equation of a sphere in different forms,plane section of a sphere Equation of a circle, sphere through a given circle ,intersection of sphere and a line , equation of tangent plane to sphere | 12 |

Class - F.Y.B.Sc.

Subject: Calculus -II

Name:-Prof. Rakshe A.R.

No. of lectures per week - 03

| Month | Topic | No. of Lectures |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| April | The Derivatives, Definition of the derivative of a function at a point, every differentiable function is continuous, Rules of differentiation, Caratheodary's theorem(without proof), The chain rule, Derivative of inverse function (without proof , only examples). The Mean Value Theorems, Interior extremum theorem, Mean Value theorems and their Consequences, Intervals of increasing and decreasing of a function,first derivative test for extrema. | 14 |
| May | L'Hospital Rule, Indeterminate forms, L'Hospital Rules(without proof),Taylor's theorem and Maclaurin'stheorem with Lagrange's form of remainder(Without proof), The nth derivative and Leibnitz theorem for successive differentiation Separable equations, Existence and Uniqueness of solutions of nonlinear equations | 12 |
| June | Linear first order equations. Transformation of nonlinear equations to separable equations. Exact differential equations, Integrating factors. | 10 |

Class: S.Y.B.Sc

Subject: Linear Algebra

Name: Prof. Wayal R.M.

No. of lectures per week-03

| MONTH | TOPIC | No. of Lectures |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| April | Row echelon form and reduced row echelon form of a matrix, consistency of homogeneous and non-homogeneous system of linear equations using rank, condition for consistency, Gauss elimination and Gauss-Jordan method, Vector spaces, subspaces, Linear dependence and independence. | 13 |
| May | Dimension of a vector space, row, column and null space of a matrix, rank and nullity | 12 |
| June | Definition and example of a linear transformation, kernel and range of L. T., rank-nullity theorem, matrices and linear transformation, linear isomorphism. | 11 |

Class: S.Y.B.Sc

Subject: Vector Calculus

Name: Prof. Wayal R.M.

No. of lectures per week-03

| MONTH | TOPIC | No. of Lectures |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| April | Curves in Space, Limits and Continuity, Derivatives and Motion, Differentiation ,Rules for Vector Function, Vector Functions of Constant Length. Integrals of Vector Functions. Arc Length along a Space Curve, Speed on a Smooth Curve, Unit Tangent Vector. Curvature of a Plane Curve, Circle of Curvature for Plane Curves, Curvature and Normal Vectors for a Space Curve., Line Integral of Scalar Functions, Additivity, Line integral in the Plane. Vector Fields, Gradient Fields, Line Integral of Vector Fields. | 15 |
| May | Work done by a Force over a Curve in Space, Flow Integrals and Circulation for Velocity Fields, Flow across the Simple Closed Plane Curve. Path Independence, Conservative and Potential Functions. Divergence, Two forms for Green's Theorem, Green's Theorem in the Plane, Parameterizations of Surfaces. Implicit surfaces, Surface integrals, Orientation of Surfaces. Surface Integrals of Vector Fields. | 12 |
| June | The Curl Vector Field, Stokes' Theorem, Conservative Fields and Stokes' Theorem. | 09 |

Class: T.Y.B.Sc

Subject: Complex Analysis

Name: Prof. Gargote A. M.

No. of lectures per week-03

| MONTH | TOPIC | No. of lecture |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| March | Sums and products, Basic algebraic properties, Further properties, Vectors and Moduli, Complex Conjugates, Exponential Form, Products and powers in exponential form, Arguments of products and quotients, Roots of complex numbers, Examples. | 10 |
| April | Regions in the complex plane. Functions of Complex Variables, Limits, Theorems on limits, Limits involving the point at infinity, Continuity, Derivatives, Differentiation formulas, Cauchy- Riemann Equations, Sufficient Conditions for differentiability, Polar coordinates, Analytic functions, Harmonic functions. The Exponential functions, The Logarithmic function, Branches and derivatives of logarithms, | 10 |
| May | Some identities involving logarithms, Complex exponents, Trigonometric functions, Hyperbolic functions. Derivatives of functions, Definite integrals of functions, Contours, Contour integral, Examples, Upper bounds for Moduli of contour integrals, | 10 |
| June | Anti-derivatives, Examples, Cauchy-Goursat's Theorem, Simply and multiply Connected domains. Cauchy integral formula, Derivatives of analytic functions. Liouville's Theorem | 6 |

Class - T.Y.B.Sc.

Subject:- Real Analysis-II

Name:-Prof. Rakshe A.R

No. of lectures per week :-03

| MONTH | TOPIC | No. of lecture |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| March | Sets of measure zero definition and theorem .Definition and existence of Riemann integral, properties of Riemann integral, Fundamental theorem of integral calculus. | 13 |
| April | Mean value theorems of integral calculus. Definition of improper integral of first kind, comparison test, test, absolute and conditional convergence, integral test for convergence of series, | 10 |
| May | definition of improper integral of second kind, Cauchy principal value. Point wise and uniform convergence of sequences of functions, consequences of uniform convergence | 10 |
| June | convergence and uniform convergence of series of functions, integration and differentiation of series of functions. | 03 |

Class - T.Y.B.Sc.

Subject:- Ring Theory

Name:-Prof. Karle S.N.

No.of Lectures per week :-03

| MONTH | TOPIC | No. of lecture |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| March | Definition and examples of Rings and Fields,., Integral Domains, The Fields of Quotients of an Integral Domain, Rings of Polynomials, Factorization of Polynomials over a Field | 12 |
| April | Homeomorphisms and Factor Rings, Prime and Maximal Ideals | 14 |
| May | Gaussian Integers and Multiplicative Norms Unique Factorization Domains , Euclidean Domain Euclidean Domains | 10 |

Class: T.Y.B.Sc

Subject: Partial Differential equation

Name: Prof. Wayal R.M.

No. of lectures per week-03

| MONTH | TOPIC | No. of Lectures |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| March | Surface and curves in three dimensions , simultaneous differential equations of the first order and the first degree in three variables. methods of solution of $dx/P=dy/Q=dz/R$. | 10 |

| | | |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| April | Pfaffian differential forms and equations. solution of Pfaffian differential equations in three variables, introduction to partial differential equations, origin of first order partial differential equations, linear equations of first order equations, integral surfaces passing through given curve. | 10 |
| May | The origin of second order partial differential equations.linear partial differential equations with constant coefficients. methods of solving linear partial differential equations, solution of reducible equations solution of irreducible equations with constant coefficients, rules of finding complementary functions, rule of finding particular integrals, classification of second order partial differential equations, canonical forms. | 12 |
| June | Solution of Laplace equations, periodic differential equations, wave equation by separation variables method. | 04 |

Class - T.Y.B.Sc.

Name:-Prof. Rakshe A.R .

Subject:- Optimization Techniques

No. of lectures per week:- 04

| MONTH | TOPIC | No. of lecture |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| March | CPM and PERT, Network representation, Critical Path Computations, Construction of the time schedule, Linear programming formulation of CPM, PERT calculations , Decision under uncertainty, Game theory | 10 |

| | | |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| April | Some basic terminologies, Optimal solution of two person zero sum game, Solution of mixed strategy games, graphical solution of games, linear programming solution of games. | 12 |
| May | Replacement of items whose efficiency deteriorates with time. Introduction, Notation, terminology and assumptions, processing n jobs through two machines, processing n jobs through three machines. Unconstrained problems, Necessary and sufficient conditions, | 10 |
| June | Newton Raphson method, Constrained problems, Equality constraints | 04 |

Class - T.Y.B.Sc.

Subject:- Computational Geometry

Name:-Prof. Gargote A.M.

No. of lectures per week - 03

| MONTH | TOPIC | No. of lecture |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| March | Introduction, Representation of Points, Transformations and Matrices, Transformation of Points, Transformation of Straight Lines, Midpoint Transformation, Transformation of Parallel Lines, Transformation of Intersecting Lines, Rotation, Reflection, Scaling, Combined Transformations, Transformation of the Unit Square, Solid Body Transformation, Translations and Homogeneous Coordinates, Rotation About an Arbitrary Point, Reflection Through an Arbitrary Line, Projection - A Geometric Interpretation of Homogeneous Coordinates, | 14 |

| | | |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | Overall Scaling, | |
| April | Points at Infinity. Three Dimensional Scaling and Shearing, Three Dimensional Rotation. Three Dimensional Reflection. Three Dimensional Translation. Multiple Transformations, Rotations about an Axis Parallel to a coordinate axis, Rotation about an Arbitrary Axis in Space, Reflection Through an Arbitrary Plane. Affine and Perspective Geometry, Orthographic Projections, Axonometric Projections, | 10 |
| May | Oblique Projections, Perspective Transformations. Techniques for generating perspective views, Vanishing points. Curve representation, non-parametric curves, parametric curves, parametric representation of a circle, parametric representation of an Ellipse, parametric representation of a parabola, parametric representation of a Hyperbola. | 09 |
| June | Introduction, definition, properties curve fitting (up to $n = 3$), equation of the curve in matrix form (up to $n = 3$). | 03 |

Class - F.Y.B.Cs.

Subject:- Graph Theory

Name:-Prof. Rakshe A.R .

No. of lectures per week-03

| Month | Topics | No. of lecture |
|-------|----------------------------------------------------------------------------------------------------------------------------------|----------------|
| March | Definition, Elementary terminologies and results, Graphs as Models. Special types of graphs. Isomorphism Adjacency and Incidence | 12 |

| | | |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | <p>Matrix of a Graph Subgraphs, induced subgraphs, Vertex deletion, Edge deletion. Complement of a graph and self-complementary graphs. Union, Intersection and Product of graphs. Fusion of vertices.</p> | |
| April | <p>Connected Graphs Walk, Trail, Path, Cycle : Definitions and elementary properties. Connected Graphs : definition and properties. Distance between two vertices, eccentricity, center, radius and diameter of a graph. Isthmus, Cutvertex : Definition and properties. Cutset, edge-connectivity, vertex connectivity. Weighted Graph and Dijkstra's Algorithm Eulerian and Hamiltonian Graphs 05 Lectures Seven Bridge Problem, Eulerian Graph : Definition and Examples, Necessary and Sufficient condition. Fleury's Algorithm.</p> | 10 |
| May | <p>Hamiltonian Graphs : Definition and Examples, Necessary Condition. Introduction of Chinese Postman Problem and Travelling Salesman Problem. Definition, Properties of trees. Center of a tree. Binary Tree : Definition and properties. Tree Traversal : Ordered rooted Tree, Preorder traversal, inorder traversal and postorder traversal, Prefix Notation. Spanning Tree : Definition, Properties, Shortest Spanning Tree, Kruskal's Algorithm.</p> | 10 |
| June | <p>Definition, Examples Elementary Terminologies and properties. Special Types of Digraphs. Connectedness of digraphs.</p> | |

| | | |
|--|----------------------------------------------|----|
| | Network and Flows : definition and examples. | 04 |
|--|----------------------------------------------|----|

Class - F.Y.B.Cs.

Subject:- Linear Algebra

Name:-Prof. Karle S. N.

No. of lectures per week - 03

| Month | Topic | No. of Lectures |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| March | Real vector space ,subspace, linear independence ,basis & dimension | 12 |
| April | row space, column space & null space,rank & nullity,,Eigen value & eigen vectors, Diagonalization , quadratic form | 10 |
| May | general linear transformation ,kernel & range,inverse linear transformation,,Matrix of general linear transformation,Cyclic group,normal subgroup,Product "ient of group,Coding of binary information &erroe detection, Decoding & error correction | 10 |
| June | public key cryptology | 04 |

Class - S.Y.B.Cs.

Subject:- Operational Research

Name:-Prof. Udhane R.B.

No. of lectures per week - 03

| Month | Topic | No. of Lectures |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| March | Graphical method_Two-Variable LP Model , Graphical LP Solution, Linear Programming Applications | 12 |
| April | LP Model in Equation Form , Transition from Graphical to Algebraic Solution ,The Simplex Method , Artificial Starting Solution , Special Cases in Simplex Method | 10 |
| May | Dual problem , Definition of the dual problem , Primal dual relationships ,Examples, Transportation problem ,Definition of the Transportation problem | 10 |
| June | The Transportation Algorithm ,The Assignment Model Optimal solution of two person zero sum games , Solution of mixed strategy games | 04 |

Class - S.Y.B.C.S.

Subject:- Computational Geometry

Name:-Prof. Karke S.N.

No. of lectures per week: 03

| Month | Topics | No. of Lectures |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| March | Two dimensional transformations ,Introduction , Representation of points, Transformation of a unit square, Solid body transformations, Transformation and homogeneous coordinates. Translation , Rotation about an arbitrary point ,Reflection through an arbitrary line , Projection – a geometric interpretation of homogeneous coordinates, Overall Scaling , Point at infinity, | 12 |
| April | Three dimensional transformations , Introduction, Three dimensional – Scaling, shearing, rotation, reflection, translation. Multiple transformations , Rotation about – an axis parallel to coordinate axes, an arbitrary axis in space. Reflection through – coordinate planes, planes parallel to coordinate planes, arbitrary planes , Affine and perspective transformations, Orthographic projections , Axonometric projections. | 12 |
| May | Oblique projections , Single point perspective transformations Vanishing points , Plane Curves ,Introduction.Curve representation ,Non – parametric curves , Parametric curves. Parametric representation of an ellipse and generation of ellipse. Parametric representation of a parabola and generation of parabolic , segment , Parametric representation of a hyperbola and generation of | 12 |

| | | |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | hyperbolic, segment , Bezier Curves – Introduction, definition, properties, curve fitting (up to $n = 3$), equation of the curve in matrix form (up to $n = 3$) | |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|

Class - F.Y.B. Com.

Subject:- Business Mathematics and Statistics-II

Name:-Prof. Udhane R.B.

No. of lectures per week:-04

| Month | Topics | No. of Lectures |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| March | Definition of a Matrix, Types of Matrices, Algebra of Matrices, Determinants, Adjoint of a Matrix, Inverse of a Matrix via Adjoint Matrix, Homogeneous System of Linear equations, Condition for Consistency of homogeneous system, Solution of Non-homogeneous System of Linear equations ,Applications in Business and Economics, Examples and Problems. | 12 |
| April | Concept of index number, price index number, price relatives. Problems in construction of index number. Construction of price index number: Weighted index Number, Laspeyre's, Paasche's and Fisher's method. Cost of living / Consumer price index number: Definition, problems in construction of index number. Methods of construction: Family budget and aggregate expenditure. Inflation, Uses of index numbers, commonly used index numbers. Examples and problems. | 12 |

| | | |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| May | Definition and terms in a LPP, formulation of LPP, Solution by Graphical method, Examples and Problems , Concept and types of correlation, Scatter diagram, Interpretation with respect to magnitude and direction of relationship. Karl Pearson's coefficient of correlation for ungrouped data. Spearman's rank correlation coefficient. | 10 |
| June | Concept of regression, Lines of regression for ungrouped data, predictions using lines of regression. Regression coefficients and their properties. Examples and problems. | 02 |

Class - S.Y.B.B.A.

Subject:- Business Mathematics

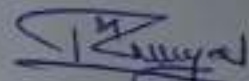

Name:-Prof. Rakshe A.R.

No. of lectures per week - 04

| Month | Topic | No. of lecture |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| March | Multivariable data, Definition of a Matrix, Types of Matrices, Algebra of Matrices, Determinants, Ad joint of a Matrix, Inverse of a Matrix via ad joint Matrix, Homogeneous System of Linear equations, Condition for Uniqueness for the homogeneous system, Solution of Non homogeneous System of Linear equations Condition for existence and uniqueness of solution, Solution using inverse of the coefficient matrix . | 12 |
| April | Ratio- Definition, Continued Ratio, Inverse Ratio, Proportion, Continued Proportion, Direct, Proportion , Inverse Proportion, Variation, Inverse Variation, Joint .Variation, Percentage- Meaning and Computations of | 14 |

| | | |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | Percentages , Simple Interest, Compound interest (reducing balance & Flat Interest rate of interest), Equated Monthly Installments(EMI), Problems | |
| May | Terms and Formulae, Trade discount, Cash discount, Problems involving cost price, Selling Price, Trade discount and Cash Discount. Introduction to Commission and brokerage, Problems on Commission and brokerage Statement and meaning of T.P.methods of finding initial basic feasible solution by North West corner Rule, Matrix Minimum method and Vogel's approximation method. Simple numerical problems. | 15 |
| June | Problems Meaning of LPP, Formulation of LPP, and solution by graphical methods. | 07 |

| | | |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|

| Jan 2022 | 5. Some Standard Discrete Probability Distributions - I | 4.3 Definition of raw, central and factorial raw moments of univariate probability Distributions and their interrelations (without proof). 4.4 Coefficients of skewness and kurtosis based on moments. | 2 |
| | | 5.1 Degenerate distribution, mean and variance 5.2 Uniform discrete distribution, p.m.f., c.d.f., mean, variance, real life situations, comments on mode and median 5.3 Bernoulli Distribution: p.m.f., mean, variance | 9 |
| Feb 2022 | | 5.4 Binomial Distribution: p.m.f., mean, variance 5.5 Hypergeometric Distribution : p.m.f., Computation of probability, situations where this distribution is applicable, binomial approximation to hypergeometric probabilities, mean and variance of the distribution | 7 |

Paper : Discrete Probability Distributions and Time series
Class: S.Y.B.Sc (Sem-III)

| Month | Topic | Subtopic | No. of Lectures |
|--------------------|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Oct 2021 | 1. Standard Discrete Distributions | 1.1 Negative Binomial Distribution: Probability mass function (p. m. f.) Notation: $X \sim NB(k, p)$. Nature of p. m. f., negative binomial distribution as a waiting time distribution, M.G.F., C.G.F., mean, variance, skewness, kurtosis (recurrence relation between moments is not expected). Relation between geometric and negative binomial distribution. Poisson approximation to negative binomial distribution. Real life | 08 |
| Oct/Nov 2021 | | 1.2 Multinomial Distribution: Probability Mass function, Notation use of MGF to obtain means, variances, covariances, total correlation coefficients, multiple and partial correlation coefficients for $k=3$, univariate marginal distribution, distribution of $X_i + X_j$, conditional distribution of X_i given $X_i + X_j = r$, variance – covariance matrix, rank of variance – covariance matrix and its interpretation and real life situations and applications. | 10 |
| Dec 2021/ Jan 2022 | | 1.3 Truncated Distributions: Concept of Truncated distribution, truncation to the right, left and on both sides. Binomial distribution $B(n, p)$ left truncated at $X=0$ (value zero is discarded), its p.m.f., mean, variance. Poisson distribution $P(m)$ left truncated at $X=0$ (value zero is discarded), its p.m.f., mean, variance. Real life situations and applications. | 07 |

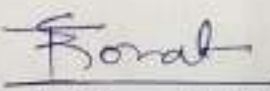

| | | | |
|------------------|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Jan/ Feb 2022 | 2.Time Series: | <p>2.1 Meaning and utility of time series, Components of time series: trend, seasonal variations, cyclical variations, irregular (error) fluctuations or noise.</p> <p>2.2 Exploratory data analysis: Time series plot to (i) check any trend, seasonality in the time series (ii) learn how to capture trend.</p> <p>2.3 Methods of trend estimation and smoothing: (i) moving average, (ii) curve fitting by least square principle, (iii) exponential smoothing.</p> <p>2.4 Measurement of seasonal variations : i) simple average method, ii) ratio to moving average method, iii) ratio to trend where trend is calculated by method of least squares.</p> <p>2.5 Choosing parameters for smoothing and forecasting.</p> <p>2.6 Forecasting based on exponential smoothing.</p> <p>2.7 Double exponential smoothing i.e. Holt-Winters method</p> <p>2.8 Fitting of autoregressive model AR (1), plotting of residuals.</p> <p>2.9 Data Analysis of Real Life Time Series:</p> | 13 |

Paper : Continuous Probability Distributions-I Class: S.Y.B.Sc (Sem-III)

| Month | Topic | Subtopic | No. of Lectures |
|----------------|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Oct / Nov 2021 | 1.Continuous Univariate Distributions: | <p>1.1 Continuous sample space: Definition, illustrations. Continuous random variable: Definition, probability density function (p.d.f.), cumulative distribution function (c.d.f.), properties of c.d.f. (without proof), probabilities of events related to random variable.</p> <p>1.2 Expectation of continuous r.v., expectation of function of r.v. $E[g(X)]$, mean, variance, geometric mean, harmonic mean, raw and central moments, skewness, kurtosis.</p> <p>1.3 Moment generating function(M.G.F.):Definition and properties,cumulant generating function (C. G. F.) : definition, properties.</p> <p>1.4 Mode, median, quartiles.</p> <p>1.5 Probability distribution of function of r. v.: $Y = g(X)$ using i) Jacobian of transformation for $g(\cdot)$ monotonic function and one-to-one, on to functions, ii) Distribution function for $Y = X^2$, $Y = X$ etc., iii) M.G.F. of $g(X)$.</p> | 10 |
| Nov /Dec 2021 | 2.Continuous Bivariate Distributions: | <p>2.1 Continuous bivariate random vector or variable $b(X, Y)$: Joint p. d. f. , joint c. d. f. , properties (without proof), probabilities of events related to r.v. (events in terms of regions bounded by regular curves, circles, straight lines). Marginal and conditional distributions.</p> <p>2.2 Expectation of r.v., expectation of function of r.v. $E[g(X, Y)]$, joint moments, Cov (X,Y), Corr (X, Y), conditional mean, conditional variance, $E[E(X Y = y)] = E(X)$, regression as a conditional expectation.</p> | 09 |

| | | | |
|-----------------------|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | | <p>2.3 Independence of r. v. (X, Y) and its extension to k dimensional r. v. Theorems on expectation: i) $E(X + Y) = E(X) + E(Y)$, (ii) $E(XY) = E(X) E(Y)$, if X and Y are independent, generalization to k variables. $E(aX + bY + c)$, $\text{Var}(aX + bY + c)$.</p> <p>2.4 M.G.F. : $M_{X,Y}(t_1, t_2)$, properties, M.G.F. of marginal distribution of r. v.s., properties</p> <p>$M_{X,Y}(t_1, t_2) = M_X(t_1, 0) M_Y(0, t_2)$, if X and Y are independent r. v.s.,</p> <p>$M_{X+Y}(t) = M_{X,Y}(t, t)$,</p> <p>$M_{X+Y}(t) = M_X(t) M_Y(t)$ if X and Y are independent r.v.s.</p> <p>2.5 Probability distribution of transformation of bivariate $U = f_1(X, Y)$, $V = f_2(X, Y)$.</p> | |
| Dec 2021 | 3. Standard Univariate Continuous Distributions: | <p>3.1 Uniform or Rectangular Distribution: Probability density function (p.d.f.) Notation : $X \sim U[a, b]$. p. d. f., sketch of p. d. f., c. d. f., mean, variance, symmetry. Distribution of i) $X \sim a$, ii) $b \sim X$, iii) $Y = F(X)$, where $F(X)$ is the c. d. f. of continuous r. v. X. Application of the result to model sampling.</p> | 04 |
| Dec 2021/ Jan 2022 | | <p>3.2 Normal Distribution:</p> <p>p. d. f. curve, identification of scale and location parameters, nature of probability curve, mean, variance, M.G.F., C.G.F., central moments, cumulants, b_1, b_2, g_1, g_2, median, mode, quartiles, mean deviation, additive property, computations of normal probabilities using normal probability integral tables, probability distribution of : i) $X \sim m$,</p> | 10 |

| | | | |
|--------------|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| | | <p>ii) $aX + b$, iii) $aX + bY + c$, iv) X^2, where X and Y are independent normal variates. Probability distribution of X, the mean of n i. i. d. $N(m, s^2)$ r. v. s. Normal probability plot, q-q plot to test normality. Model sampling from Normal distribution using (i) Distribution function method and (ii) Box-Muller transformation as an application of simulation. Statement and proof of central limit theorem (CLT) for i. i. d. r. v. s with finite positive variance. (Proof should be using M.G.F.) Its illustration for Poisson and Binomial distributions.</p> | |
| Jan/Feb 2022 | | <p>1.1 Continuous sample space: Definition, illustrations. Continuous random variable: Definition, probability density function (p.d.f.), cumulative distribution function (c.d.f.), properties of c.d.f. (without proof), probabilities of events related to random variable. 1.2 Expectation of continuous r.v., expectation of function of r.v. $E[g(X)]$, mean, variance, geometric mean, harmonic mean, raw and central moments, skewness, kurtosis. 1.3 Moment generating function (M.G.F.): Definition and properties, cumulant generating function (C. G. F.): definition, properties. 1.4 Mode, median, quartiles. 1.5 Probability distribution of function of r. v.: $Y = g(X)$ using i) Jacobian of transformation for $g(\cdot)$ monotonic function and one-to-one, on to functions, ii) Distribution function for $Y = X^2$, $Y = X$ etc., iii) M.G.F. of $g(X)$.</p> | 04 |

Syllabus Completion Report

F. Y. B. Sc. - Botany: 2021-22

Plant life and utilization I (BO 111)

(Semester - I; Paper - I)

| Sr. No. | Month | Topics |
|---------|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | September | INTRODUCTION - General outline of plant kingdom (Lower Cryptogams: Thallophytes- Algae, Fungi & Lichens; Higher Cryptogams: Bryophytes and Pteridophytes; Phanerogams: Gymnosperms and Angiosperms- Dicotyledons and Monocotyledons). Distinguishing characters of these groups and mention few common examples from each. Revision and Assignment |
| 2 | October | ALGAE - Introduction, General Characters, Classification (Bold and Wynne 1978) up to classes with reasons. Life Cycle of <i>Spirogyra</i> w.r.t. Habit, Habitat, Structure of thallus, structure of typical cell, Reproduction- Vegetative, Asexual and Sexual, systematic position with reasons. Utilization of Algae in Biofuel Industry, Agriculture, Pharmaceuticals, Food and Fodder Revision and Assignment |
| 3 | November | LICHENS - Introduction, General Characters, Nature of Association, forms- Crustose, Foliose and Fruticose. Utilization of lichens. FUNGI - Introduction, General Characters, Classification (Ainsworth, 1973). Life Cycle of Mushroom- <i>Agaricus bisporus</i> w.r.t. Habit, Habitat, Structure of thallus, Structure of Sporocarp, Structure of Gill, Reproduction- Asexual and sexual, Systematic position. Utilization of Fungi in Industry, Agriculture, Food and Pharmaceuticals. Revision and Assignment |
| 4 | December and January | BRYOPHYTES - Introduction, General Characters, Classification (G.M. Smith 1955) Life Cycle of <i>Riccia</i> w.r.t. Habit, habitat, external and internal structure of thallus, Reproduction- vegetative, asexual and sexual- Structure of sex organs, fertilization, Revision and Assignment Theory Internal Exam |
| 5 | February | BRYOPHYTES Structure of mature sporophyte, structure of spore, systematic position with reasons. Utilization: Bryophytes as ecological indicators, agriculture, fuel, industry and medicine Practical Internal Exam |

Total lectures conducted: 37 lectures

Student's strength: 73

BO: 351 Cryptogamic Botany

(Semester- V; Paper - I)

| Sr. No | Month | Topics |
|--------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | October | Introduction: Cryptogams- meaning, Types- Lower Cryptogams, brief Review with examples Algae: General characters, distribution, Thallus organization, habit and Habitat reproduction and Classification (G.M.Smith 1955) up to classes. |
| 2 | November | Study of life cycle of algae with reference to taxonomic position, Occurrence, Thallus structure, and reproduction of <i>Nostoc</i> , <i>Oedogonium</i> <i>Chara</i> , <i>Sargassum</i> and <i>Batrachospermum</i> . Economic importance of algae- Role in industry, agriculture, fodder and medicine. |
| 3 | December | Fungi: General characters, Habit and habitats, thallus organization, cell wall composition, nutrition and Classification. (Alexopoulos and Mims 1979) up to classes. Study of life cycle of fungi with reference to taxonomic position, thallus structure, and reproduction of <i>Mucor</i> (Zygomycotina), |
| 4 | January | <i>Saccharomyces</i> (Ascomycotina), <i>Puccinia</i> (Basidiomycotina), <i>Penicillium</i> and <i>Cercospora</i> (Deuteromycotina) [Two members of Deutero.] Symbiotic Associations - Lichens, <i>Mycorrhiza</i> and their significance Theory Internal Exam |
| 5 | February | Revision and Assignment Practical Internal Exam |

Total lectures conducted: 46 lectures

BO.352: Archegoniate

(Semester- V; Paper – II)

| Sr. No | Month | Topics |
|--------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | October | Introduction to Archegoniate: Introduction , general characters, distribution of Bryophytes to land habit, classification of Bryophytes according to G.M. Smith (1955) up to classes with reasons. Range of thallus organisation , origin of Bryophytes - Pteridophytes and Algal hypothesis, evolution of sporophyte. |
| 2 | November | Study of Life Cycle of Bryophytes with respect to Taxonomic position, Morphology, Anatomy, Reproduction, Gametophytes and sporophytes of <i>Marchantia</i> , <i>Anthoceros</i> and <i>Funaria</i> . Ecological and economic importance of Bryophyte. |
| 3 | December | Introduction- Vascular Cryptogams, General characteristics, Classification according to K.R. Sporne (1975) up to classes with reasons, Diversity and Distribution of Pteridophytes . Resemblances of Pteridophytes with Bryophytes, Differences between Pteridophytes and Bryophytes, Origin of Pteridophytes -Algal and Bryophytes, Evolution of Pteridophytes- Telome Theory and Enation Theory. |
| 5 | January | Study of Life Cycle of Pteridophytes with respect to Taxonomic position, Morphology, Anatomy, Reproduction, Sporophytes and Gametophytes of <i>Psilotum</i> , <i>Selaginella</i> and <i>Equisetum</i> . Ecological and Economical Importance of Pteridophytes. Theory Internal Exam |
| 6 | February | Practical Internal Exam Revision, Assignment and Question paper discussion. |

Total lectures conducted:45 lectures

BO.353: Spermatophyta and Palaeobotany

(Semester- V; Paper – III)

| Sr. No | Month | Topics |
|--------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | October | Introduction to Gymnosperms General characters, economic importance and classification according to Chamberlain (1934). |
| 2 | November | Study of life cycle of <i>Pinus</i> with reference to distribution, morphology, anatomy, reproduction, gametophyte, sporophyte, seed structure and alternation of generations. Revision and Assignment |
| 3 | December | Study of life cycle of <i>Gnetum</i> with reference to distribution, morphology, anatomy, reproduction, gametophyte, sporophyte, seed Structure and alternation of enerations. Fossil- Definition, process of fossil formation, types of fossils.-Impression, Compression, Petrification, Pith cast and Coal ball. Origin of angiosperms: with reference to time, place and ancestry- 1) Pseudanthial theory 2) Transitional-Combinational Theory Revision and Assignment |
| 4 | January | Classification: Outline, Merit and Demerits of Cronquist's System and APG IV system of classification. Study of following families with reference to systematic position (As per Bentham & Hooker), Diagnostic characters,floral formula, floral diagram and any five examples with their economic importance – Nymphaeaceae, Oleaceae, Amaranthaceae, Cannaceae Herbaria and Botanical Gardens Functions of Herbarium, Important herbaria (World: Kew herbarium; India: Central National Herbarium, Kolkata). Botanic gardens of the world (Royal Botanic Garden, Kew) and India Theory Internal Exam Revision and Assignment |
| 5 | February | Speciation & Endemism Species concept (Biological, Taxonomic & Phylogenetic Species Concept), Speciation (Allopatric, Sympatric &Parapatric), Endemism and its types (Palaeoendemism, Holoendemism and Neoendemism) Practical Internal Exam Revision, Question paper discussion |

BO.355: Cell and Molecular Biology

(Semester- V; Paper - V)

| Sr. No | Month | Topics |
|--------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | October | Introduction to Cell Biology : Definition, Brief history of Cell Biology, Units of measurement for cell, Interdisciplinary nature of Cell Biology |
| 2 | November | Cell organelles : Ultrastructure, components and functions of Cell wall and cell membranes, mitochondria and Chloroplast, endoplasmic Reticulum, Golgi apparatus, Lysosomes, Vacuoles |
| 3 | December | Nucleus : Morphology and ultrastructure of nucleus, nucleolus and nucleolar organizer Nuclear envelope – structure of nuclear pore complex, transport of molecules across nuclear envelope. Chromosomes : Euchromatin and heterochromatin Histones, Packing of DNA into chromosomes in eukaryotes, Karyotype and ideogram, Polytene chromosomes and lampbrush chromosomes. |
| 4 | January | Genetic material DNA : historical perspective from 1953 to 2020, Griffith's and Avery's transformation experiments, Hershey-Chase bacteriophage experiment. DNA replication (Prokaryotes and Eukaryotes): Molecular mechanism of DNA replication. Enzymes involved in both prokaryotic and eukaryotic DNA replication and their inhibitors (antibiotics). Gene expression : Transcription (Prokaryotes in details and passing remarks on Eukaryotes) Types of RNA: mRNA, tRNA, rRNA; Theory Internal Exam |
| 5 | February | Types of promoters; types of RNA polymerase enzymes in eukaryotes; molecular mechanism of transcription. Translation (Prokaryotes and Eukaryotes): Definition, concept and properties of genetic code; molecular mechanism of translation. Regulation of gene expression : Concept of operon, <i>lac</i> operon and <i>trp</i> operon, positive and negative control, one gene one enzyme hypothesis. Cell signaling : Introduction and definition, Signaling molecules and receptors, Calcium signaling pathway in plants Practical Internal Exam Revision, Question paper discussion |

BO.3510: Medicinal Botany

(Semester- V; Paper - X)

| Sr. No | Month | Topics |
|--------|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | October | Medicinal Plants: History, Scope and Importance 01 2 Indigenous Medicinal Sciences; Definition and Scope Ayurveda: History, origin, panchamahabhutas, saptadhatu and tridosha concepts, Rasayana, plants used in ayurvedic treatments. |
| 2 | November | Siddha: Origin of Siddha medicinal systems, Basis of Siddha system, plants used in Siddha medicine. Unani: History, concept: Umoor-e- tabiya, tumors treatments/ therapy, polyherbal formulations. Conservation of endangered and endemic medicinal plants: Definition: endemic and endangered medicinal plants, Red list criteria; <i>In situ</i> conservation: Biosphere reserves, sacred groves, National Parks; <i>Ex situ</i> conservation: Botanic Gardens, Ethnomedicinal plant Gardens. |
| 3 | December | Propagation of Medicinal Plants: Objectives of the nursery, its classification, important components of a nursery, sowing, pricking, use of green house for nursery production, propagation through cuttings, layering, grafting and budding. |
| 4 | January | Theory Internal Exam Assignment Ethnobotany and Folk medicines: Definition; Ethnobotany in India: Methods to study ethnobotany; Applications of Ethnobotany: National interacts, Palaeo-ethnobotany. Folk medicines of ethnobotany, ethnomedicine, ethnoecology, ethnic communities of India. Application of natural products to certain diseases. Jaundice, cardiac, infertility, diabetics, Blood pressure and skin diseases. Theory Internal Exam |

|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| March | Photosynthesis: Mechanism of photosynthesis- Electromagnetic spectrum, Organization of Light-Absorbing Antenna Systems |
| April | Photosynthesis (cont.) Structure of chloroplast, Light Reaction: (Cyclic and Non-cyclic photophosphorylation) Dark Reaction: Calvin-Benson Cycle, Photorespiration, C4 cycle and CAM pathway. Respiration: Types of respiration (Aerobic and anaerobic), Mechanism of aerobic respiration (Glycolysis, TCA cycle, Terminal oxidation and phosphorylation in respiratory chain); Pentose Phosphate Pathway. Revision & Assignment Mineral nutrition: Classification of mineral elements, macro and micronutrients; Role of essential elements; Transport of ions across cell membrane, Ionophores, Carriers and Channels. |
| May | Stomatal Biology: Light-dependent Stomatal Opening, Mediation of Bluelight Photoreception in Guard Cells by Zeaxanthin, Reversal of Blue Light-Stimulated Opening by Green Light, The Resolving Power of Photophysiology (Overview). Translocation in phloem: Composition of phloem sap, girdling experiment; Pressure flow model. Plant growth regulators: Discovery and physiological roles of auxins, gibberellins, cytokinins, ABA, ethylene. Revision & Assignment Theory Internal Examination Practical Internal Examination Practical External Examination |
| June | Photomorphogenesis: Red and far red light responses on photomorphogenesis; Phytochrome (discovery and mode of action). |

Dr. Sangeetha J.S.

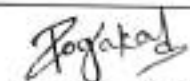

Syllabus Completion Report

T. Y. B. Sc. - Botany: 2021-22

BO.362: Biochemistry

(Semester- VI; Paper – II)

| | |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| March | <p>Water: The solvent of life: Physical properties of water, structure of water molecule, polarity of water molecule, weak interactions in aqueous solutions.</p> <p>Amino acids and proteins: Structure, classification, properties and functions of amino acids. Structure (primary, secondary, tertiary and quaternary), properties and functions of proteins Biological disorders of amino acid metabolism. Commercial applications.</p> |
| April | <p>Enzymes: Definition, nature of enzymes and co-factors, classification and properties of enzymes, active site. Mechanism of enzyme action: free energy, activation energy, binding energy, transition state, lock and key hypothesis, induced fit theory. Factors affecting enzyme activity: pH, temperature, substrate concentration, enzyme concentration. Enzyme inhibition: Competitive, uncompetitive, non-competitive. Reversible and irreversible inhibition, feedback inhibition.</p> |
| May | <p>Carbohydrates: Definition, classification of carbohydrates- Monosaccharides: aldoses and ketoses, configurations, linear to ring structure; Oligosaccharides: glycosidic bond, reducing and non-reducing sugars; Polysaccharides: homopolysaccharides, heteropolysaccharides, examples, their structures, locations and role. Properties and functions of carbohydrates. Commercial applications.</p> <p>Lipids: Definition, classification of lipids: simple, conjugate and derived lipids, properties and functions of lipids. Biological disorders of lipid metabolism. Commercial applications.</p> <p>Vitamins: Definition, classification of vitamins. source and functions of vitamins.</p> <p>Foundation of Biochemistry : From molecules to the first cell (origin of a cell), Miller and Urey experiment. Biomolecules of a cell, functional groups in biomolecules, conformations and configurations of biomolecules.</p> <p>Revision, assignment</p> <p>Theory internal and practical external examination</p> |

Prof. P. D. Kad

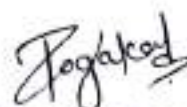

Syllabus Completion Report

T. Y. B. Sc. - Botany: 2021-22

BO.363: Plant Pathology

(Semester- VI; Paper - III)

| | |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| March | <p>Fundamentals of Plant Pathology: Introduction, Important terminology-Incitants, Host, Symptoms, Parasite, Pathogen, Inoculum, Penetration, Infection, Incubation, Disease. Economic importance of plant diseases. History of plant pathology, Introduction to Indian Agriculture Research Institute (IARI), International Crop Research Institute for Semi-Arid Tropics (ICRISAT), Contribution of Anton De Bary and Prof. B.B. Mundkur</p> <p>Disease Development: Concept of disease cycle, Inoculation, Prepenetration, Penetration, Infection, Dissemination. Epidemics-Forms, Decline, Exponential model.</p> |
| April | <p>Defense Mechanisms: Concept and Definition, Types-Preexisting- Structural and chemical, Induced- Structural and Biochemical.</p> <p>Methods of Studying Plant Diseases. Macroscopic study, Microscopic study, Koch's postulates. Types of culture Media, Pure culture methods- Streak plate, Pour plate, Spread plate.</p> <p>Fungal Plant Diseases Introduction to fungi as plant pathogens. Study of Diseases- Downy mildew of Grapes, Head smut of Jowar, Tikka diseases of Groundnut with reference to causal organism, symptoms and disease management.</p> <p>Bacterial Plant Diseases. Introduction to bacteria as plant pathogens, Study of Diseases- Citrus Canker, Black arm of Cotton with reference to causal organism, symptoms and disease management.</p> |
| May | <p>Mycoplasma Plant Diseases: Introduction to Mycoplasma as plant pathogens, Study of Diseases- Grassy shoot disease of sugarcane, Little leaf of brinjal with reference to causal organism, symptoms and disease management.</p> <p>Viral Plant Diseases: Introduction of Virus as plant pathogens. Study of Diseases- Papaya Mosaic Disease, Bunchy top of Banana with reference to causal organism, symptoms and causal organism</p> <p>Nematodal Plant Diseases: Introduction to Nematodes as plant pathogens. Study of Diseases- Root knot diseases of vegetables, Soyabean cyst Nematodes with reference to causal organism, symptoms, Integrated management of Nematodal diseases.</p> <p>Non-Parasitic Diseases. The impact and abiotic causes- Temperature, Soil moisture and relative humidity, Poor oxygen, Poor light, Air pollutants, mineral deficiencies. Herbicidal injury, Study of Mango necrosis, Black Heart of Potato.</p> <p>Principles of plant diseases control: General account, Quarantine, Eradication, cultural control practices, Biological control. Curative measures, chemical control, Use of Effective Microorganism solution (EMS), Microbial Pesticides.</p> <p>Revision, assignment Theory internal and practical external examination</p> |

Prof. P. D. Kad

BO: 365 Advanced Plant Biotechnology

(Semester- VI; Paper - V)

| Sr. No | Month | Topics |
|--------|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | March | Biotechnology: Introduction, Traditional and modern Biotechnology. Impact of Biotechnology on Health care, Agriculture, and Environment |
| 2 | April | Plant Tissue Culture: Concepts of Cell theory & Cellular totipotency, Landmarks in plant tissue culture. Pluripotency, Differentiation, dedifferentiation, redifferentiation, Hormones used in PTC, 'Explant' for plant tissue culture and Response of explants in vitro- callus formation, organogenesis (direct and indirect) and embryogenesis (direct and indirect). Micro propagation of Banana (in detail from Selection of explant to hardening and marketing) |
| 3 | May | Techniques of Genetic Engineering and Methods of gene transfer in Plants- Cryopreservation and Germplasm Conservation Definition and concept, techniques of cryopreservation, cold storage, long term and short term storage, applications. Germplasm Conservation: Preservation of Cell, tissue, organ, whole organism. Concept of Gene Bank, DNA Bank, Seed Bank, Pollen Bank etc. |
| 4 | June | Biotechnology and Society: Biotechnology- Benefits, GM foods and its safety, Recombinant foods and religious beliefs, Recombinant therapeutic product for human health care. Patenting of biotechnological inventions and Intellectual property rights Microbial Biotechnology: Biochemistry of fermentation, Microorganism used in fermentation, fermentable substrate, Ethanol fermentation methods, Distilleries producing alcohols. Commercial production: Alcoholic beverages, organic acids, citric acids. Advantages of fermentation. Transgenic Plants as Bioreactors: Metabolic engineering of starch, cyclodextrins, fructans, Bioplastics, Genetically engineered plants as protein factories, Production of therapeutic proteins from plants. |

R.V. Mechkar
Prof. R.V.Mechkar

T. Y. B. Sc. (Zoology)

Course Title: Genetics

Course code: ZO 354

| Sr.No | Month | Topics | Teacher |
|-------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | Oct | 1. Introduction to genetics: 1.1 Classical and Modern concept of Gene, Cistron, Muton, Recon. 1.2 Mendel's laws of Inheritance. | DNB |
| 2 | Oct & Nov | 2 Exceptions to Mendelian Inheritance: 2.1 Incomplete dominance. 2.2 Co-dominance 2.3 Multiple alleles: Concept, characteristics and importance of multiple alleles, ABO & Rh - blood group system and its medico legal importance. 2.4 Lethal alleles. | DNB |
| 3 | Nov | 3. Gene Mutation: 3.1 Definition. 3.2 Types of mutations: spontaneous, induced, somatic, gametic, forward, reverse. Types of point mutation - deletion, insertion, substitution, transversion, transition. 3.3 Mutagenic agents a) UV radiation and ionising radiation. b) Base analogs, alkylating and intercalating agents. | DNB |
| 4 | Dec | 4. Sex-determination: 4.1 Introduction. 4.2 Types of sex determination: -XX-XY, ZZ-ZW, XX-XO and Parthenogenesis, Hypodiploidy. 4.3 Gynandromorphism. | DNB |
| 5 | Dec | 5. Population Genetics: 5.1 Basic Concepts in population genetics: Mendelian population, gene pool, gene / allele, Frequency, chance mating (Panmictic mating). 5.2 Hardy Weinberg law and its equilibrium. | DNB |
| 6 | Jan | 6.1 Karyotype. 6.2 Genetic disorders, Structural & numerical alterations of chromosomes (chromosomal aneuploidy - Down, Patau, Edward, Turner and Klinefelter syndromes). | DNB |

| | | | |
|---|-----|-----------------------------------------------------------------------------------------------------------------|-----|
| | | | |
| 7 | Jan | 7. Sex linked inheritance in human: 7.1 Colour – blindness. 7.2 Haemophilia. 7.3 Hypertichosis. | DNB |
| 8 | Feb | 8. Application of genetics: 8.1 Genetic counselling. 8.2 Diagnostics & breeding technology. | DNB |

As per above mention theory syllabus of Semester I completed successfully.

Prof. D. N. Birhade

Course Title: Biological chemistry

| Sr. no. | Month | Topics | Teacher |
|---------|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1. | Oct | Introduction of Biochemistry: Importance of Biochemistry in Life Sciences. | PPS |
| 2. | Dec | pH and Buffers: 2.1 Concept of pH. 2.2 Concept of pH scale, biological significance of p H. 2.3 Concept of acid and base, Ionization of acids and bases. 2.4 Derivation of Henderson-Hassel Balch equation & its applications. 2.5 Buffer - Definition, Concept, Functions, Types of buffer and Buffering Capacity. | PPS |
| 3. | Dec | Carbohydrates: 3.1 Definition, Classification & Biological importance of Carbohydrates. 3.2 Isomerism in carbohydrates - Structural and Stereoisomerism. 3.4 Significance of Gluconeogenesis, Glycogenolysis and Glycogenesis. 3.3 Clinical Significance - Hypoglycemia and Hyperglycemia. | PPS |
| 4. | Jan | Amino acids and Proteins: 4.1 General Structure of amino acids and Peptide bond. 4.2 Essential and non-essential amino acids. 4.3 Types of proteins, protein structures (primary, secondary, tertiary and quaternary structures with suitable example), Forces responsible for their stability. 4.4 Biological importance of proteins – Biocatalysts, Carrier proteins Contractile proteins, Hormonal role of proteins. | PPS |
| 5. | Jan | Enzymes: 5.1 Nomenclature, Types and properties of enzymes. 5.2 Regulatory and non-regulatory enzymes. 5.3 Enzyme inhibition. 5.4 Factors influencing enzyme activity (pH, temperature, substrate concentration). 5.5 Introduction of isoenzymes and cofactor. 5.6 Clinical significance of enzymes - PKU and AKU. | PPS |

| | | | |
|----|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 6. | Feb | Lipids: 6.1 Introduction. 6.2. Fatty acids - Types and nomenclature (saturated and unsaturated). 6.3 Clinical significance (obesity, atherosclerosis, myocardial infarction). 6.4 Biological importance of lipids. | PPS |
|----|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|

As per above mention theory syllabus of Semester I completed successfully. For completion of this syllabus 45 lectures are conducted.

 Prof. P. P. Shindekar

Syllabus completion Report (A.Y.2021 – 2022)

T. Y. B. Sc. Zoology

Course Code: ZO – 356

Course Title: Parasitology

| Sr. no. | Month | Topic | Teacher |
|---------|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1. | Oct | 1. Introduction, Scope and Branches of Parasitology: 1.1. Definition: host, parasite, vector, commensalism, mutualism and parasitism. 1.2. Branches of parasitology | PPS |
| 2. | Oct | 2. Types of Parasites and Hosts: 2.1 Ectoparasites 2.2 Endoparasites and its subtypes. 2.3 Types of hosts - Intermediate, definitive, paratenic and reservoir. | PPS |
| 3. | Nov | 3. Host - Parasite relationship: 3.1 Host specificity. 3.2 Types of host specificity: structural specificity, physiological specificity and ecological specificity. 3.3 Effects of parasite on host. | PPS |
| 4. | Nov & Dec | 4. Study of Parasitic Protists: 4.1 Entamoeba histolytica - Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment. 4.2 Plasmodium vivax - Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment. | PPS |
| 5. | Dec | 5. Study of Parasitic worms: 5.1 Ascaris lumbricoides - Study of Morphology, Life Cycle, and Prevalence. 5.2 Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment. 5.3 Taenia solium (Tapeworm) - Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, | PPS |

| | | | |
|----|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| | | Prophylaxis and Treatment. | |
| 6. | Jan | 6. Study of Parasitic Arthropoda: Morphology, pathogenicity and control measures of – 6.1 Soft tick. 6.2 Head louse. 6.3 Rat flea. 6.4 Bed bug. | PPS |

As per above mention theory syllabus of Semester I completed successfully. For completion of this syllabus 39 lectures are conducted.

Prof. P. P. shindekar

Syllabus completion Report (A.Y.2021 – 2022)

T. Y. B. Sc. Zoology

Course Code: ZO – 3510

Course Title: Aquarium management

| Sr. no. | Month | Topic | Teacher |
|---------|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1. | Oct | 1.Introduction to Aquarium Fish Keeping: 1.1 The potential scope of Aquarium Fish Industry as a Cottage Industry. 1.2 Exotic and Endemic species of Aquarium Fishes. 1.3 Nutritional value of fish | SSN |
| 2. | Oct | 2.Introduction to Aquarium Fish Keeping: 1.1 The potential scope of Aquarium Fish Industry as a Cottage Industry. 1.2 Exotic and Endemic species of Aquarium Fishes. 1.3 Nutritional value of fish | SSN |
| 3. | Nov | 3.Food and feeding of Aquarium Fishes: 3.1 Use of live fish feed organisms. 3.2 Preparation and composition of formulated fish feeds. 3.3 Overview on types of fish food. | SSN |
| 4. | Nov & Dec | 4.Fish Transportation: 4.1 Live fish transport: a) Fish handling. b) Fish packing. c) Fish forwarding techniques. 4.2 Causes of mortality in transport. | SSN |
| 5. | Dec | 5.Maintenance of Aquarium: 5.1 General Aquarium Maintenance - budget for setting up an Aquarium. 5.2 Fish Farm as a Cottage Industry, Rules & regulations of fish rearing. 5.3 Common diseases of Aquarium fish. | SSN |

| | | | |
|----|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 6. | Jan | 6. Physico-chemical parameters of water for fish culture: 6.1 Acidity, Alkalinity, Calcium, Nitrate, Ammonia, Total hardness 7. Fish preservation: 7.1 Fish preservation and processing. | SSN |
| 7. | Feb | 8. Fish breeding: 8.1 Types of fish breeding - a) Natural fish breeding. b) Induced fish breeding | SSN |

As per above mention theory syllabus of Semester I completed successfully. For completion of this syllabus 38 lectures are conducted.

Prof S.S. Naikare

Syllabus completion Report (A.Y. 2021 – 2022)

T. Y. B. Sc. Zoology ZO – 3511 Poultry Management

| Sr. No | Month | Topic | Professor |
|--------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| 1 | November | Introduction to Poultry Farming: 1.1 Definition of Poultry, Importance of Poultry Farming and Poultry Development in India. 1.2 Present and future prospects. | SVT |
| 2 | December | Breeding Management: 2.1 Male and female reproductive system of chicken. 2.2 Breeds and strains of broilers and layers of chicken. 2.3 General aspects of breeding for better egg production and body weight gain. 2.4 Selection and culling. 2.5 Artificial insemination. | SVT |
| 3 | December | Housing Management: 3.1 Establishment of poultry farm. 3.2 Housing and equipment. 3.3 Incubation and hatching of eggs. 3.4 Broiler and layer management. 3.5 Lighting schedule for poultry. 3.6 Transport strategy of Poultry birds. | SVT |
| 4 | January | Feeding Management: 4.1 Digestive system and Digestion Mechanism of chicken. 4.2 Feed ingredients. 4.3 Feed processing. | SVT |

| | | | |
|---|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| | | 4.4 Formulation of feed viz., Starter, Grower, Layer, Finisher and Breeder ration, Feed conversion ratio (FCR), Nutritional deficiency conditions. | |
| 5 | January | Health Management: 5.1 Vaccination schedule for poultry birds. 5.2 Common poultry diseases, i. e. Ranikhet, Marek, Chicken pox, Gumboro, Infectious bronchitis and Chronic Respiratory Disease (CRD). 5.3 Control of internal and external parasites. | SVT |
| 6 | February | Poultry Products: 6.1 Preservation and storage of eggs. 6.2 Grading of eggs and AGMARK standard of egg. 6.3 Egg powder. 6.4 Slaughtering and processing of chicken. 6.5 Poultry By Products – Feathers and Poultry Manure. | SVT |

As per above mention SPPU T.Y.B.Sc Zoology theory syllabus of Semester I completed successfully. For completion of this syllabus 45 lectures are conducted.

Course Title: Animal Physiology

Course Code: ZO-362

| Month | Title | Teacher Name |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| April 2022 | 1.Nutrition and digestion: 1.1 Nutritional requirement & balanced diet. 1.2 Digestion and absorption of carbohydrates, proteins and lipids. 1.3 Vitamins - outline of fat soluble and water-soluble vitamins; Sources, deficiency and diseases. | SSN |
| April 2022 | 2.Respiration: 2.1 Mechanism of respiration: Regulation of ventilation in lungs, exchange of gases at respiratory surface. 2.2 Respiratory pigments in animals: Haemoglobin, Hemocyanin, Hemerythrin, Chlorocruorin. 2.3 Transport of gases : O ₂ and CO ₂ transport. 3.Circulation: 3.1 Blood: Definition and its constituents, functions of blood. 3.2 Heart: Structure of human heart, Pace maker, Cardiac Cycle. 3.3 Origin and conduction of heart beat. | SSN |
| May 2022 | 4. Excretion: 4.1 Structure of Uriniferous tubule. 4.2 Mechanism of urine formation. 4.3 Normal and abnormal constituents of urine. Elementary idea of dialysis. | SSN |
| May 2022 | 5.Muscles: 5.1 Structure of smooth, skeletal and cardiac muscles. 5.2 Mechanism of muscle contraction by Sliding filament theory. | SSN |
| June 2022 | 6.Reproduction and Endocrine Glands: 6.1 Physiology of male reproduction, hormonal control of spermatogenesis. 6.2 Physiology of female reproduction, hormonal control of menstrual cycle. Structure and functions of pituitary, thyroid, parathyroid, pancreas and adrenal glands. | SSN |

T.Y.B.Sc

Course Title: Evolutionary Biology

Course Code: ZO 366

Semester: VI

| Month | Title | Teacher Name |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| March 2022 | 1.Introduction: 1.1 Concept of Evolution. 1.2 Origin of life. 1.3 Origin of eukaryotic cell (Origin of mitochondria, plastids & symbionts) 2. Evidences of Evolution: 2.1 Analogy and Homology. 2.2 Embryological Evidences of Evolution. 2.3 Evolutionary & Paleontological Evidences. | SSN |
| April 2022 | 3. Historical Review of Evolutionary Concept: 3.1 Theories of Evolution. 3.2 Lamarckism. 3.3 Darwinism and Neo Darwinism. 3.4 Mutation Theory. 3.5 Modern Synthetic theory. 4. Sources of Variations: 4.1 Variation and Mutations. | SSN |
| May 2022 | 5. Isolation | SSN |
| May 2022 | 6.Speciation: 6.1 Types of speciation (Allopatric & Sympatric). 6.2 Mechanism of speciation. 6.3 Patterns of speciation. 6.4 Factors influencing speciation | SSN |
| May 2022 | 7.Population Genetics: 7.1 Hardy-Weinberg Law & Genetic Drift. 7.2 Types of Natural Selection. | SSN |
| May 2022 | 8.Origin of Man: 8.1 Evolution of Man (Evolution of anthropoids including man) - Kenyapithecus to Homo sapiens. | SSN |
| June 2022 | 9.Zoogeographical Realms With reference to fauna: | SSN |
| June 2022 | 10.Extinctions: 10.1 Extinction - An Overview. | SSN |

As per mention above 75% syllabus is completed and remaining will be complete in first week of June.

Syllabus Completion report

A.Y.-2021-2022(Semester VI)

T.Y. B. Sc.

Course Title: Molecular Biology

Course Code: ZO-363:

| Month | Title | Teacher Name |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| April | 1. Nucleic Acids and Chromatin: 1.1 Structure of RNA & DNA. 1.2 Types of RNA. 1.3 DNA as genetic material - evidences (Griffith's, Avery et al., Hershey and Chase experiment), RNA as genetic material - TMV 4. 1.4 Structure of Chromatin, packaging of DNA, Heterochromatin, Euchromatin. | PPS |
| April | 2. Central Dogma of Molecular Biology: 2.1 DNA Replication - Semiconservative (Messelson and Stahl experiment), Basic mechanism of replication in prokaryotes and eukaryotes. 2.2 Transcription - 2.2.1 Basic mechanism of transcription in prokaryotes and eukaryotes, RNA polymerase enzyme in prokaryotes. 2.2.2 RNA modifications and processing (splicing - mRNA, modifications at 3' and 5' end). 2.3 Translation - Genetic code, properties of genetic code, Basic mechanism of Translation in E. coli and eukaryotic cells. | PPS |
| May | 3. Lac operon | PPS |
| May | 4. DNA repair mechanism: Photo repair, dark repair, base excision repair. | PPS |
| June | 5. Recombinant DNA Technology: Introduction, restriction enzymes, cloning vector, PCR (polymerase chain reaction), DNA finger printing. | PPS |

T.Y.B.Sc

Course Title: Techniques in Biology

Course Code: ZO 365

Semester: VI

| Month | Title | Teacher Name |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| March | 1. Microscopy: 1.1 Definitions - Resolving Power, Limit of Resolution and Magnification, Numerical Aperture. 1.2 Basic principle of microscopes - Light, Fluorescence, Phase Contrast, Stereo Microscope, SEM and TEM. | PPS |
| April | 2. Microtomy: Tissue fixation and Processing 2.1 Methods of tissue fixation: Chemical fixation and physical fixation. 2.2 Procurement of tissue and importance of fixation of tissues. 2.3 Dehydration, clearing, impregnation, embedding and block making. 2.4 Types of microtomes. 2.5 Section cutting: steps and precautions, common faults in section cutting, reasons & remedies. 2.6 Mounting and spreading of ribbons. 2.7 General procedure for staining of sections. 2.8 Demonstration of Nucleic acid (Feulgen Reaction). | PPS |
| May | 3. Haematological Techniques: 3.1 Total count of RBCs, WBCs and Differential count of WBCs and their significance. 3.2 Bleeding time, clotting time and their significance. | PPS |
| May | 4. Immunological Techniques: 4.1 Antigen-Antibody Interactions - Immunodiffusion. 4.2 Principle & Working of ELISA. 4.3 Raising Monoclonal Antibodies. 4.4 Application of Immunological techniques in disease diagnosis. | PPS |
| May | 5. Types of PCR & DNA Barcoding | PPS |
| May | 6. Methods in Biodiversity: 6.1 Introduction to sampling and sample size. 6.2 Biodiversity Indices - Species richness, Simpson Diversity Index, Shannon Diversity Index. | PPS |

| | | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| | 6.3 Measuring Biodiversity- Quadrat sampling, Transect sampling, Insect survey - Active (sweep netting, aquatic nets) and Passive methodology (Pit fall traps, Light traps). | |
| June | 7. Instruments in Field Biology: 7.1 Binoculars, GPS, Basic digital camera techniques: Camera lens - prime and kit lens, Aperture mode, Shutter mode, Megapixels, Telephoto lens, macro lens. 7.2 Adapters for camera and microscopes, Mobile's camera. | PPS |
| June | 8. Laboratory techniques: 8.1 Microphotographic techniques - CCD and CMOS camera, digital camera. 8.2 Software for image analysis - Image J and GIMP. | PPS |

As per mention above 75% syllabus is completed and remaining will be complete in first week of June.

| | | |

ZO - 3610 Environmental Impact Assessment

| Sr. No | Month | Topic | Professor |
|--------|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| 1 | April | 1. Environment: 1.1 Definition. 1.2 Divisions. 1.3 Importance | SVT |
| 2 | April | 2. Pollution: 2.1 Definition and types. 2.2 Impact on wildlife, natural resources, development | SVT |
| 3 | May | 3. Sustainable development: 3.1 Definition and need. 3.2 Exploitation of natural resources. 3.3 Concept of carrying capacity. 3.4 Three pillars of Sustainability. 3.5 UN 17 Sustainable Development Goals (SDGs) | SVT |
| 4 | May | 4. Overview of Environmental Protection acts: 4.1 The Air (Prevention and Control of Pollution) Act, 1981. 4.2 The Water (Prevention and Control of Pollution) Act 1974. 4.3 The Environment Protection Act 1986. 4.4 The National Green Tribunal Act 2010. 4.5 Biological Diversity Act 2002 | SVT |

| | | | |
|---|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 5 | May | 5. Environmental Impact Assessment (EIA): 5.1 Definition, need and importance of EIA. 5.2 EIA notification 2006 - key elements, History and Evolution of EIA. 5.3 Categories of Industries / establishments requiring EIA, Types of EIA - strategic EIA, regional EIA, sectoral EIA, project level EIA and life cycle assessment. 5.4 Rapid and comprehensive EIA | SVT |
| 6 | May | 6. EIA Process: 6.1 Screening, Scoping and consideration of alternatives. 6.2 Baseline data collection, Impact analysis, Mitigation, Reporting, Public hearing. 6.3 Review of EIA. 6.4 Decision-making, monitoring clearance conditions | SVT |
| 7 | June | 7. Stakeholders in EIA process: 7.1 Project proponent, Environmental consultant. 7.2 CPCB / MPCB. 7.3 Public, EIA agency (IAA). | SVT |
| 8 | June | 8. Overview of Scheme for Accreditation of EIA Consultant Organizations (NABET / QCI): 8.1 Eligibility and benefits. 8.2 EIA coordinator (EC), Functional area experts (FAEs). 8.3 Functional area associate (FAA) and team members: Role, educational qualification, experience and functions. | SVT |

Syllabus Completion Report (Sem-I)

(2021-22)

T.Y.B.Sc. PH 335: Computational Physics

| Sr. No. | CompletedTopics | Month |
|----------------|----------------------------------------------------------------------------------------------------------|--------------------------------|
| 01 | 1. Concepts of programming: Definition and Properties of algorithms, Algorithm development, | 28/10/2021 To 01/11/2021 |
| 02 | Algorithm development, Flow charts- symbols and simple flowcharts | |
| 03 | Flow charts and Algorithms for Kinematic equations, Free fall, Equation of state, Factorial of a number. | |
| 04 | Types of programming language: Lower, middle and higher level languages. | |
| 05 | 1. C Programming Structure of C program, Character set, key words, | 15/11/2021 To 15/12/2021 |
| 06 | Constants and variables, Variable names, | |
| 07 | Data types and their declarations, Symbolic Constants. | |
| 08 | Input/output functions: scanf (), printf (), getchar (), putchar (), getch (), gets (), puts (). | |
| 09 | Operators and Expressions: Arithmetic Operators, Relational Operators, Logical Operators, | |
| 10 | Assignment Operators, Conditional Operator. Formatted input/output | |
| 11 | Control statements: If, if else, while, do while for loop, nested control structures | |

| | | |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| 12 | (nested if, nested loops), break, continue, switch- case statement, goto statement. | |
| 13 | Use of Library functions: e.g. mathematical, trigonometric, graphics. | |
| 14 | 3. Arrays and Pointers in C Arrays: 1-D, 2-D and String | 20/12/2021 To 21/12/2021 |
| 15 | Examples: Arranging numbers in descending and ascending order, | |
| 16 | Sum of matrices, multiplication of matrices. | |
| 17 | Concept of Pointers | |
| 18 | 4. User Defined Function in C User defined functions: Definitions and declaration of function, function prototype. | 22/12/2021 To 29/12/2021 |
| 19 | Passing arguments (Call by value, Call by reference). | |
| 20 | Storage Classes: Auto, External, Static, Register variables. | |
| 21 | 5. Graphics in C: Some simple graphic commands | |
| | - Line, Circle, Arc, Ellipse, Bar.,Problems | 04/01/2022 To 06/01/2022 |
| 22 | 6. Computational Physics: Errors in Computation: Inherent errors in storing numbers due to finite bit representation to use inComputer, Truncation error, round off errors | 07/01/2022 to 12/02/2022 |
| 23 | Iterative methods: Discussion of algorithm and flowcharts and writing Cprograms for finding | |
| 24 | single root of equation using bi-section method, NewtonRaphsonmethod. | |
| 25 | Discussion of algorithm and flowcharts and writing C program for trapezoidalrule and Simpson's 1/3rd rule | |

Dr. V.D.Kulkarni

T.Y.B.Sc. PH 353 Classical Mechanics (Sem-I)

Syllabus Completion Report (2021-22)

T.Y.B.Sc. (Sem-VI)

Thermodynamics and Statistical Physics (PH-363)

| Sr. No. | Completed Topics | Dates |
|----------------|---------------------------------------------------------------------------------------------------------------------------|--------------------------|
| 01 | Ch-1 - Kinetic Theory of gases Mean Free Path Theory of gases | 30/03/2022 |
| 02 | Transport Phenomena, Viscosity | 31/03/2022 |
| 03 | Thermal conductivity and diffusion | 01/04/2022 |
| 04 | Thermodynamic functions | 04/04/2022 |
| 05 | Enthalpy, Entropy, Internal Energy, Helmholtz Functions | 05/04/2022 06/04/2022 |
| 06 | Maxwell's relations | 07/04/2022 |
| 07 | First and Second TdS equations Specific and Latent heat equations | 08/04/2022 |
| 08 | Joule – Thomson's effect, Problems | 09/04/2022 |
| 09 | Ch-2- Elementary Concepts of Statistics Probability ,Distributions functions,Problems | 11/04/2022 |
| 10 | Random Walk Problem and Binomial distribution | 12/04/2022 |
| 11 | Simple Random Problem, Calculation of mean Values | 13/04/2022 |
| 12 | Probability distribution for large N | 16/04/2022 |
| 13 | Gaussian Probability distribution and Problems | 18/04/2022 |
| 14 | Ch-3- Statistical distribution of system of particles and Ensembles State of Systems, Statistical Ensembles | 19/04/2022 |
| | Completed Topics | Dates |
| Sr. No. | | |
| 15 | Basic Postulates, Probability Calculations | 21/04/2022 |
| 16 | Behavior of density of states | 22/04/2022 |

| | | |
|----|-------------------------------------------------------------------------------|--------------------------|
| 17 | Thermal. Mechanical Interactions, Problems | 25/04/2022 |
| 18 | Micro canonical Ensembles, Canonical Ensembles | 26/04/2022 |
| 19 | Applications of Canonical Ensembles | 27/04/2022 |
| 20 | Molecules in ideal gas, Mean Values in Canonical Ensembles, Problems | 28/04/2022 29/04/2022 |
| 21 | Ch-4-Introduction to Quantum States Quantum distribution function | 02/05/2022 |
| 22 | Maxwell – Boltzman Statistics, Bose – Einstein Statistics | 04/05/2022 05/05/2022 |
| 23 | Fermi – Dirac Statistics | 09/05/2022 |
| 24 | Comparisons of B-E,M-B,F-D Statistics , Applications of Quantum Statistics | 10/05/2022 12/05/2022 |
| 25 | Problems | 13/05/2022 14/05/2022 |
| 26 | Internal Test | 18/05/2022 |

PHY-3610 SEC (Z): Calibration Techniques

| | | |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| 1 | Activity: <ol style="list-style-type: none"> 1. RTD calibration check 2. Calibration of digital balance 3. Calibration of PH/Conductivity meter 4. Calibration of Volt meter 5. Calibration of Current meter 6. Calibration of Oscilloscopes | 19May 2022 – 24 May 2022 |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|

1) T.Y.B.Sc.:- Practicals of one batch of Semester -1 and 2 completed in Academic Year 2021-2022.

- 2) Projects of T.Y.B.Sc Students:- Projects of one batch of Semester -1 and 2 completed in Academic Year 2021-2022.
- 3) F.Y.B.Sc:- Practicals of Semester -1 and 2 completed in Academic Year 2021-2022.

Dr. V.D.Kulkarni

Syllabus completion Report

T.Y.B.Sc. Physics (Sem V)

PHY-351: Mathematical Methods in Physics-II

Year: 2021-2022

Teacher: A.B.Kanawade

| Chapter No. | Month | Contents | Remarks |
|-------------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | Nov / Dec 2021 | 1: Curvilinear Co-ordinates Review of Cartesian, spherical and cylindrical co-ordinate, transformation equation, General Curvilinear co-ordinate system: Co-ordinate surface, co-ordinate lines, length, surfaces and volume elements in curvilinear co-ordinate system. Orthogonal curvilinear co-ordinate system, expressions for gradient, divergence, Laplacian, and curl, special case for gradient, divergence and curl in Cartesian, spherical polar and cylindrical co-ordinate system, Problems. | |
| 2 | Dec 2021 | 2: The Special Theory of Relativity Introduction, Newtonian relativity, Galilean transformation equation, | |

| | | | |
|----------|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | <p>Michelson-Morley experiment,</p> <p>Postulates of special theory of relativity,</p> <p>Lorentz transformations,</p> <p>Lorentz transformations,</p> <p>Kinematic effects of Lorentz transformation,</p> <p>Length contraction,</p> <p>Proper time, Problems.</p> | |
| 3 | Dec / Jan 2021 | <p>3: Partial Differential Equations</p> <p>Introduction to Partial differential equations (PDE),</p> <p>General methods for solving second order PDE,</p> <p>Method of separation of variables in Cartesian,</p> <p>Spherical polar and cylindrical co-ordinate system (two dimensional Laplace's equation,</p> <p>one dimensional Wave equation),</p> <p>Singular points ($x = x_0$),</p> <p>Solution of differential equation-Statement of Fuch's theorem,</p> <p>Frobenius method of series solution.</p> | |
| 4 | Jan / Feb 2021 | <p>4: Special Functions</p> <p>Introduction, generating function for Legendre Polynomials: $P_n(x)$,</p> <p>Properties of Legendre Polynomials,</p> <p>Generating function for Hermite Polynomials: $H_n(x)$,</p> <p>Properties of Hermite Polynomials,</p> <p>Bessel function of first kind: $J_n(x)$,</p> | |

| | | | |
|--|--|----------------------------------------------------------------------------------------------------------------|--|
| | | Bessel function of first kind: $J_n(x)$, Properties of Bessel function of first kind, Problems. | |
|--|--|----------------------------------------------------------------------------------------------------------------|--|

The syllabus of the course has been completed as per the month wise schedule.

Syllabus completion Report

T.Y.B.Sc. Physics (Sem V)

Year: 2021-2022

PHY-3510 SEC (K): Smart Sensors and Transducer Technology, Teacher: A.B.Kanawade

| Chapter No. | Month | Contents | Remarks |
|-------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | Oct 2021 | 1) Mechanical and Electromechanical sensor: Definition, principle of sensing & transduction, classification. Resistive (potentiometric type): Forms, material, resolution, accuracy, sensitivity. Strain gauge: Theory, type, materials, design consideration, sensitivity, gauge factor, variation with temperature, adhesive, rosettes. LVDT: Construction, material, output input relationship, I/O curve, discussion. | |
| 2 | Nov 2021 | 2) Capacitive sensors: Variable distance-parallel plate type, variable area- parallel plate, serrated plate/teeth type and cylindrical type, Variable dielectric constant type, calculation of sensitivity. | |

| | | | |
|--|--|------------------------------------------------------------------------------------------------------------|--|
| | | 5) Magnetic sensor/Hall effect/proximity sensor based measurement magnetic susceptibility magnetisation | |
| | | 6) LDR based measurement light intensity etc. | |

The syllabus of the course has been completed as per the month wise schedule.

Syllabus completion Report

S.Y.B.Sc. Physics (Sem III)
PHY-232(A): Electronics-I

Year: 2021-2022
Teacher: A.B.Kanawade

| Chapter No. | Month | Contents | Remarks |
|-------------|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | Oct / Nov 2021 | 1. Network Theorem: 1.1 Krichhoff's Law 1.2 Voltage and current Divider Circuit 1.3 Thevenin's Theorem 1.4 Norton's Theorem 1.5 Superposition Theorem 1.6 Maximum Power transfer theorem (With proof) 1.7 Problems | |
| 2 | Nov / Dec 2021 | 2. Study of Transistor 2.1 Bijunction Transistor 1. Bipolar Junction Transistor, Types, Symbol and basic action. 2. Configuration (Common Base, Common Emitter and Common Collector) 3. Current Gain Factors (α and β) and their relations | |

| | | | |
|----------|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | <p>4. Input, Output and transfer Characteristic of CE Configuration</p> <p>5. Biasing method and Voltage Divider</p> <p>6. DC Load line (CE), Operating Point (Q-point)</p> <p>7. Transistor as a switch, 8. Problems</p> <p>2.2 Uniunction Transistor:</p> <p>1. Symbol, Types, Construction, Working Principle, I-V characteristics, Specifications and parameters of Unijunction Transistor (UJT)</p> <p>2. UJT as a relaxation Oscillator.</p> | |
| 3 | Jan 2022 | <p>3.Operational Amplifiers and Application</p> <p>3.1 Operational Amplifiers:</p> <p>1. Introduction</p> <p>2. Ideal and practical Characteristics</p> <p>3. Operational Amplifier: IC741-Block Diagram and Pin diagram</p> <p>4. Concept of Virtual Ground</p> <p>5. Inverting and Non-inverting operational amp with concept of gain</p> <p>6. Operational amplifier as an adder and subtractor</p> <p>7. Problems</p> <p>3.2 Oscillators:</p> <p>1. Concept of Positive and negative feed back</p> <p>2. Barkhausein Criteria for an oscillator</p> <p>3. Construction, working and application of phase shift oscillator using IC741</p> <p>4. Problems</p> | |
| 4 | Jan / Feb 2022 | <p>4. Number System and Logic Gates</p> <p>1. Number System: Binary, Binary coded Decimal (BCD), Octal, Hexadecimal</p> | |

| | | | |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | 2. Addition and Subtraction of binary numbers and binary fractions using one's and two's complement 3. Basic Logic gates (OR, AND, NOT) 4. Derived gates: NOR, NAND, EXOR, EXNOR, with symbols and truth table 5. Boolean Algebra 6. De Morgan's theorem and its verification, 7. Problems | |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|

The syllabus of the course has been completed as per the month wise schedule.

Syllabus completion Report

T.Y.B.Sc. Physics (Sem VI)
PHY-361: Solid State Physics

Year: 2021-2022
Teacher: A.B.Kanawade

| Chapter No. | Month | Contents | Remarks |
|-------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | Mar / Apr 2022 | 1: The Crystalline Structures (10 L) Lattice, Basis, Translational Vectors, Primitive Unit Cell, Symmetry Operations, Different types of lattices: 2D and 3D (Bravais lattices) Miller indices, Inter Planer Distances, SC, BCC and FCC structures, Packing Fraction, Crystal structures NaCl, diamond, CsCl, ZnS, HCP, Concept of Reciprocal Lattice and its properties, Problems | |
| 2 | April 2022 | 2: X ray Diffraction and Experimental Methods (9 L) Bragg's Diffraction, Bragg's Law, Experimental X-ray diffraction Methods: The Laue Method, Bragg's Spectrometer, The Powder Crystal Method, Analysis of cubic structure by Powder Method, Ewald's Construction, Bragg's Diffraction condition in direct and reciprocal lattice, Problems | |
| 3 | May 2022 | 3: Free Electron and Band Theory of Metals (9L) Assumptions of Classical and Sommerfeld Free Electron model, Energy levels and Density of States (One and Three Dimensions), Nearly free electron model, Fermi energy, Fermi level, Hall Effect, Mobility, Hall Angle | |

| | | | |
|----------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | Band Theory of Solids: Origin of energy gap, Energy bands in Solids, Distinction between metal, semiconductor and insulator, Problems | |
| 4 | May 2022 | 4: Magnetism (8L) Diamagnetism, Langevin theory of Diamagnetism, Paramagnetism, Langevin theory of Paramagnetism, Ferromagnetism, Antiferromagnetism, Ferromagnetic Domains, Hysteresis, Curie temperature, Neel temperature, Superconductivity, Problems | |

The syllabus of the course has been completed as per the month wise schedule.

Syllabus completion Report

T.Y.B.Sc. Physics (Sem VI)
PHY-362: Quantum Mechanics

Year: 2021-2022
Teacher: A.B.Kanawade

| Chapter No. | Month | Contents | Remarks |
|-------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | April 2022 | Origin of Quantum Mechanics: (08 L) 1. Historical Background: Review of Black body radiation, photoelectric effect 2. Matter waves - De Broglie hypothesis. - Davisson and Germer experiment. 3. Wave particle duality 4. Concept of wave function, wave packet, phase velocity, group velocity and relation between them 5. Heisenberg's uncertainty principle with Electron diffraction experiment, different forms of uncertainty. Problems | |
| 2 | April 2022 | The Schrodinger equation: (10 L) 1. Physical interpretation of Wave function 2. Schrodinger time dependent equation. 3. Schrodinger time independent equation (Steady state equation). 4. Requirements of wave function. 5. Probability current density, equation of continuity and its physical significance. 6. An operator in Quantum mechanics. - Eigen function and Eigen | |

| | | | |
|----------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | values. 7. Expectation value – Ehrenfest's theorem(omly statements), Problems | |
| 3 | May 2022 | Applications of Schrodinger Steady state equation: (14 L) 1. Free particle. 2. Step Potential 3. Potential barrier(Qualitative discussion), Barrier potential and tunneling effect. 4. Particle in infinitely deep potential well (one - dimension). 5. Schroedinger equation in spherical polar coordinate system 6. Rigid rotator (Free axis) 7. Problems | |
| 5 | May 2022 | Operators in Quantum Mechanics: (04 L) 1. Hermitian operator. 2. Position, Momentum operator, angular momentum operator, and total energy operator (Hamiltonian). 3. Commutator brackets- Simultaneous Eigen functions. 4. Commutator algebra. 5. Commutator brackets using position, momentum and angular momentum operator. 6. Concept of parity according to quantum mechanics, parity operator and its Eigen values. 7. Applications of operators in quantum mechanics 8. Problems | |

The syllabus of the course has been completed as per the month wise schedule.

Syllabus completion Report

S.Y.B.Sc. Physics (Sem IV)
PHY-242: Optics

Year: 2021-2022
Teacher: A.B.Kanawade

| Chapte r No. | Month | Contents | Remarks |
|-----------------|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1 | April 2022 | 1. Geometrical optics and Lens aberrations: (12L) (a) Geometrical optics: 1.1 Introduction to lenses and sign conventions. 1.2 Thin lenses: Lens equation for single convex lens 1.3 Lens maker equation 1.4 Concept of magnification, deviation and power of a thin lens 1.5 Equivalent focal length of two thin lens system 1.6 Concept of cardinal points 1.7 Problems (b) Lens Aberrations: 1.8 Introduction to Aberration 1.9 Types of aberration: Monochromatic and Chromatic | |

| | | | |
|----------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | | Aberration (Only discussion) | |
| 2 | April /May 2022 | 2. Optical Instruments: (6L) 2.1 Introduction to optical instruments 2.2 Types of optical instruments: Simple Microscope, Compound Microscope and Astronomical telescope (only construction and working) 2.3 Eyepiece: Ramsden's eye piece (Expression), Huygens eye piece and Gauss's eyepiece (only qualitative discussion) 2.4 Problems. | |
| 3 | May 2022 | 3. Interference and Diffraction: (12L) (a) Interference: 3.1 Introduction to interference 3.2 Types of Interference (only discussion) 3.3 Phase change on reflection (Stokes treatment). 3.4 Interference due to reflected light 3.5 Interference due to transmitted light. 3.6 Newton's ring (to calculate wavelength) 3.7 Problems (b) Diffraction: 3.8 Introduction to diffraction 3.9 Types of diffraction (only discussion) 3.10 Fraunhofer's diffraction due to single slit and double slit (only qualitative discussion) 3.11 Plane transmission grating and grating equation (only principal maxima) 3.12 Rayleigh criterion for resolution (only qualitative discussion) , 3.13 Problems | |
| 4 | May / June 2022 | 4. Polarization: (6L) 4.1 Introduction to polarization 4.2 Brewster's law 4.3 Malus's Law 4.4 Polarization by double refraction 4.5 Nicol Prism 4.6 Application of polarization 4.7 Problems | |

The syllabus of the course has been completed as per the month wise schedule.

Prof.V.B.Deshmukh

1. FYBSc. Physics II (Physics principles and applications)-41 Lectures

| Month | Period | Chapter | Topic |
|-------------------|--------|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| September 2021 | 6 | Physics of Atoms | The concept of atom (Atomic Models: Thompson and Rutherford) Atomic Spectra Bohr Theory Hydrogen atom Spectra Frank Hertz experiment |
| October 2021 | 6 | LASERS | Absorption, Spontaneous Emission, and Stimulated Emission, Population Inversion and Laser Action, Applications of Lasers Problem solved , Assignment |
| November 2021 | 12 | Physics of Molecules | Bonding Mechanisms: A Survey Ionic Bonds Covalent Bonds Van der Waals Bonds The Hydrogen Bond Metallic Bond, Variation of potential energy with inter-atomic distance, Concept of Rotational and vibration energy levels of diatomic |

| | | | |

Problem solving steps. 1.3 Algorithms-definition, characteristics , examples ,advantages and limitations. 1.4 Flowcharts - definition, notations , examples , advantages and limitations, Comparison with algorithms. 1.5 Pseudo codes - notations, examples, advantages and limitations. 1.6 Programming Languages as tools, programming paradigms, types of languages 1.7 Converting pseudo-code to programs. 1.8 Compilation process (compilers , interpreters), linking and loading, syntax and semantic errors, testing a program 1.9 Good Programming Practices | 05 | 09 |

| | | | | |
|----------|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|-----------|
| | | (naming conventions , documentation, indentation). | | |
| 2 | December | Unit 2: 'C' Fundamentals 2.1 History of 'C' language. Application areas. 2.2 Structure of a 'C' program. 2.3 'C' Program development life cycle. 2.4 Function as building blocks. 2.5 'C' tokens 2.6 Character set, Keywords , Identifiers 2.7 Variables, Constants (character, integer, float, string, escape sequences, enumeration constant). 2.8 Data Types (Built-in and user defined data types). 2.9 Operators, Expressions, types of operators, Operator precedence and Order of evaluation. 2.10 Character input and output. 2.11 String input and output. 2.12 Formatted input and output | 07 | 14 |
| 3 | December | Unit 3: Control Structures 3.1 Decision making structures:- if ,if-else, switch and conditional operator. 3.2 Loop control structures:- while ,do while, for. 3.3 Use of break and continue. 3.4 Nested structures. 3.5 Unconditional branching (goto statement) | 06 | 13 |
| 4 | January | Unit 4 : Functions 4.1 Concept of function, Advantages of Modular design. 4.2 Standard library functions. 4.3 User defined functions:- declaration , definition, function | 06 | 06 |

| | | | | |
|---|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|----|
| | | call, parameter passing (by value), return statement. 4.4 Recursive functions. 4.5 Scope of variables and Storage classes. | | |
| 5 | February | Unit 5: Arrays 5.1 Concept of array. 5.2 Types of Arrays – One , Two and Multidimensional array. 5.3 Array Operations - declaration, initialization, accessing array elements. 5.4 Memory representation of two-dimensional array (row major and column major) 5.5 Passing arrays to function. 5.6 Array applications - Finding maximum and minimum, Counting occurrences, Linear search, Sorting an array (Simple exchange sort, bubble sort), Merging two sorted arrays, Matrix operations (trace of matrix, addition, transpose, multiplication, symmetric, upper/ lower triangular matrix) | 06 | 06 |

SYLLABUS COMPLETION REPORT

ACADEMIC YEAR-2021-2022 SEM-I

Class: F.Y.B.Sc.(Computer Science) Div:A

Subject Name: ELC-111: Semiconductor Devices & Basic Electronic Systems

Subject Teacher:-Prof. Dighe A.R.

Syllabus completed=100%

| Sr. no | Month | Name Of Topics | Allocated Lectures | Conducted lectures |
|---------------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------|
| 1 | December | Unit 1. Semiconductor Diodes Semiconductor, P and N type semiconductors, Formation of PN junction diode, it's working, Forward and Reverse bias characteristics, Zener diode: working principle, breakdown mechanism and characteristics, Working principle of Light emitting diode, photo diode, optocoupler, Solar cell working principle and characteristics | 6 | 5 |
| 2 | December | Unit 2. Bipolar Junction Transistor (BJT) Bipolar Junction Transistor (BJT) symbol, types, construction; working principle, Transistor amplifier configurations - CB, CC (only concept), CE configuration: input and output characteristics, Definition of α , β and γ , Concept of Biasing (numerical problems not expected), Potential Divider bias, Transistor as amplifier (Concept of Gain and Bandwidth expected), Transistor as a switch. | 7 | 8 |

| | | | | |
|---|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|---|
| 3 | January | Unit 3. MOSFET MOSFET types, Working principle, Characteristics, Application of MOSFET as a Switch | 5 | 4 |
| 4 | January | Unit 4. POWER SUPPLY Block Diagram of Regulated Power Supply, Rectifiers (half wave, full wave, Bridge), rectifier with capacitor-filter, Use of Zener Diode as a Voltage Regulator, IC 78XX and 79XX as regulator, Block Diagram and explanation of SMPS, Block diagram and explanation of UPS | 6 | 5 |
| 5 | February | Unit 5. OSCILLATORS Barkhausen Criteria, Low frequency Wein-bridge oscillator, High frequency crystal oscillator, IC 555 as astablemultivibrator used as square wave generator / clock Unit | 6 | 5 |
| 6 | February | 6. DATA CONVERTERS Need of Digital to Analog converters, parameters, weighted resistive network, R-2R ladder network, need of Analog to Digital converters, parameters, Flash ADC, successive approximation ADC | 6 | 5 |

Subject – Data Structure and Algorithm-I

Subject Teacher: Prof.D.R.Kad

Syllabus Completed=100%

| Sr.No. | Month | Name Of Topics | Allocated Lectures | Conducted lectures |
|--------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------|
| 1 | November | UNIT-1: Introduction to Data Structures and Algorithm Analysis:- Introduction ,Need of Data Structure , Definitions - Data and information, Data type, Data object, ADT, Data Structure ,Types of Data Structures , Algorithm analysis ,Space and time complexity, Graphical understanding of the relation between different functions of n, examples of linear loop, logarithmic,quadratic loop etc. , Best, Worst, Average case analysis, Asymptotic notations (Big O, Omega Ω ,), Problems on time complexity calculation | 4 | 6 |
| 2 | December | UNIT 2-Array as a Data Structure:- ADT of array, Operations, Array applications – Searching, Sequential search, variations - Sentinel search, Probability search, ordered list | 10 | 12 |

| | | | | |
|----------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|-----------|
| | | search, Binary Search, Comparison of searching methods, Sorting Terminology- Internal, External, Stable, In-place Sorting, Comparison Based Sorting - Lower bound on comparison based sorting, Methods- Bubble Sort, Insertion Sort, Selection Sort, Algorithm design strategies - Divide and Conquer strategy, Merge Sort, Quick Sort, complexity analysis of sorting methods. Non Comparison Based Sorting: Counting Sort, Radix Sort, complexity analysis. Comparison of sorting methods | | |
| 3 | January | UNIT 3-Linked List:- List as a Data Structure, differences with array. Dynamic implementation of Linked List, internal and external pointers, Types of Linked List – Singly, Doubly, Circular, Operations on Linked List - create, traverse, insert, delete, search, sort, reverse, concatenate, merge, time complexity of operations. Applications of Linked List – polynomial representation, Addition of two polynomials, Generalized linked list – concept, representation, multiple-variable polynomial representation using generalized list., | 10 | 14 |
| 4 | February | UNIT 4-Stack:- Introduction Operations – init(), push(), pop(), isEmpty(), isFull(), peek(), time complexity of operations. Implementation- Static and Dynamic with comparison, Applications of stack. Function call and recursion, String reversal, | 6 | 5 |

| | | | | |
|---|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|---|
| | | palindrome checking ,Expression types - infix, prefix and postfix, expression conversion and evaluation (implementation of infix to postfix, evaluation of postfix) ,Backtracking strategy - 4 queens problem (implementation using stack) | | |
| 5 | February | UNIT 5-Queue Introduction Operations - init(), enqueue(), dequeue(), isEmpty(), isFull(), peek(),time complexity of operations, differences with stack. Implementation - Static and Dynamic with comparison Types of Queue - Linear Queue, Circular Queue, Priority Queue, Double Ended Queue (with implementation) Applications – CPU Scheduling in multiprogramming environment, Round robin algorithm . | 6 | 6 |

Subject – Python Programming

Subject Teacher: Prof.Pardeshi P.N.

Syllabus Completed=100%

| Sr. No. | Month | Name OF Topics | Allocated Lectures | Conducted lectures |
|----------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------|
| 1 | November | UNIT-1:Introduction to Python:-Introduction to Python The Python Programming Language, History, features, Applications, Installing Python, Running Simple Python program Basics of Python Standard data types - basic, none, Boolean (true & False), numbers, Variables, Constants,Python identifiers and reserved words, Lines and indentation, multi-line statements and Comments,Input/output with print and input ,functions Declaration, Operations on Data such as assignment, arithmetic, relational, logical and bitwise operations, dry run, Simple Input and o/p. | 3 | 3 |

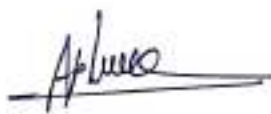

| | | | | |
|---|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|---|
| 2 | December | UNIT 2:-Control Statements:-Sequence Control – Precedence of operators, Type conversion Conditional Statements: if, if-else, nested if-else, Looping- for, while, nested loops, loop control statements (break, continue, pass) a. Strings: declaration, manipulation, special operations, escape character, string formatting operator, Raw String, Unicode strings, Built-in String methods. | 4 | 3 |
| 3 | December | Unit 3:-Lists, functions, tuples and dictionaries, Sets:-Python Lists: Concept, creating and accessing elements, updating & deleting lists, traversing a List, reverse Built-in List Operators, Concatenation, Repetition, In Operator, Built-in List functions and methods. Functions: Definitions and Uses, Function Calls, Type Conversion Functions, Math Functions, Composition, Adding New Functions, Flow of Execution, Parameters and Arguments, Variables and Parameters, Stack Diagrams, Void Functions, Anonymous functions Importing with from, Return Values, Boolean Functions, More Recursion, Functional programming tools - filter(), map(), and | 7 | 7 |

| | | | | |
|---|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|---|
| | | <p>reduce(), recursion, lambda forms. Tuples and Dictionaries: Tuples, Accessing values in Tuples, Tuple Assignment, Tuples as return values, Variable-length argument tuples, and Basic tuples operations, Concatenation, Repetition, in Operator, Iteration, Built-in tuple functions, indexing, slicing and matrices. Creating a Dictionary, Accessing Values in a dictionary, Updating Dictionary, Deleting Elements from Dictionary, Properties of Dictionary keys, Operations in Dictionary, Built-In Dictionary Functions, Built-in Dictionary Methods. Sets- Definition, transaction of set(Adding, Union, intersection), working with sets</p> | | |
| 4 | January | <p>UNIT:- 4 :-Modules ,Working with file ,Exception Handling:-</p> <p>Modules: Importing module, Creating & exploring modules, Math module, Random module, Time module</p> <p>Packages: Importing package, creating package, examples</p> <p>Working with files: Creating files and Operations on files</p> | 4 | 4 |

| | | | | |
|--|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| | | <p>(open, close, read, write), File object attributes, file positions, Listing Files in a Directory, Testing File Types, Removing files and directories, copying and renaming files, splitting pathnames, creating and moving directories</p> <p>Regular Expression- Concept of regular expression, various types of regular expressions, using match function.</p> <p>Exception Handling: Built-in Exceptions, Handling Exceptions, Exception with Arguments, User-defined Exceptions.</p> | | |
|--|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|

मा. प्राचार्य

हुतात्मा राजगुरु महाविद्यालय

राजगुरुनगर

विषय : सत्र दुसरे अभ्यासक्रम पूर्तता अहवाल 2021 - 2022

महोदय,

मी या शैक्षणिक वर्षात दुस-या सत्रात प्रथम वर्ष कला, द्वितीय वर्ष कला, तृतीय वर्ष कला या वर्गांना इतिहास विषयाचे अध्यापन केले. या वर्गांचे संबंधित अभ्यासक्रम पूर्ण झाले आहेत. पूर्ण केलेले अभ्यासक्रम खाली देत आहे.

प्रथम वर्ष कला : प्रारंभिक भारत : उत्तर - मौर्यकाळ ते राष्ट्रकुट काळ

प्र.1 मध्य आशियाशी संबंध आणि शुंग -सातवाहन काळ प्र.2 दक्षिण भारताचा प्रारंभिक इतिहास प्र.3 उत्तर भारत : गुप्त साम्राज्य आणि हर्षवर्धन प्र.4 प्रादेशिक राज्ये : संक्षिप्त इतिहास

द्वितीय वर्ष कला : मराठ्यांचा इतिहास (1707 - 1818)

प्र.1 मराठी सत्तेचे एकत्रीकरण आणि विस्तार प्र.2 मराठा सत्तेचे दृढीकरण प्र.3 पानिपतनंतरचे पुनरुज्जीवन आणि -हास प्र.4 पेशवेकालीन प्रशासन व समाज

तृतीय वर्ष कला : स्वातंत्र्योत्तर भारत (1947 - 1991)

प्र.1 स्वातंत्र्यानंतरची आव्हाने प्र.2 भारताचे परराष्ट्र धोरण प्र.3 भारताचे अंतर्गत धोरण प्र.4 भारताचे आर्थिक धोरण

उपरोक्त अभ्यासक्रम पूर्ण केला आहे. तरी याबाबत योग्य ती नोंद व्हावी ही विनंती.
